

## Department of Artificial Intelligence & Machine Learning

**Event Name:** “Workshop on C++”

**Date :** 26/5/2023

**Time:** 9AM to 1PM

Department of Artificial Intelligence & Machine Learning had organised a peer learning session on C++. Upon receiving the feedback from students that C++ is also needed for their placements along with Python and Java which they are already familiar, It would be beneficial for them to start learning C++ as well. C++ is a widely used programming language, particularly in industries such as game development, system programming, and high-performance computing. So department had arranged a peer learning session. The students, Mr. Aditya , Mr. Darshan, Mr. Saicharan, Mr. Prasanna Kotyal and Mr. Rohan Siddeshwara conducted hands on workshop on C++ in two sessions covering the basics of C++ and implementation of data structures in C++.

Mr. Darshan explain the concepts of linked list in the session

Students sharing the feedback about the session

The session turned out to be a great learning experience for participants and department appreciated the efforts of the students to share their knowledge with their peers.
