Event Description:

The Evolve.AI club had conducted an event called 'Express-A-Thon' which was an open-invitation technical hackathon where the students competed to create the best product in merely 6 hours. The premise of this event was speed, as the time given to come up with an idea and execute it was limited compared to other events. Throughout the event, mentors offered guidance, organizers kept things running smoothly. As the hackathon progressed, code turned into prototypes fueled by energetic discussions and a drive for innovation.

Dr. Sreejith and Dr. Sonia from the AIML Department were the judges for this event. It was through their time and attention that the participating teams got the attention they needed to showcase their idea comfortably with in-depth technicality and passion.

Refreshments were kept available for teams that needed it, and were distributed at snack time. The club members were constantly monitoring the teams and assisting them when needed throughout the duration of the event, giving close attention to everything to make the event run as smoothly as possible, for both the organizers and the participants.
