& Resource Person
Dr. Agalya V
Associate Head R & D
(IPR CELL, NHCE)

Department of Artificial Intelligence & Machine Learning in association with the Institution's Innovation Council conducted a seminar on **“Patent Drafting”** on 2nd of February 2024 at Tejas Seminar Hall, with resource person being Dr. Agalya V, Associate Head, R&D (IPR Cell), NHCE.

Objective:

The objective of the Patent Drafting Workshop for the 5th Semester AIML students was to equip participants with a comprehensive understanding of patent basics and to develop practical skills in patent drafting.

Description:

The event commenced with Dr. Agalya V elucidating the definition of a patent and the integral components of a patent, further delving into aspects of its validity and recognition. Subsequently, she detailed the techniques of crafting specific sections of a patent, including the title and its related elements. To foster active participation among the students, she presented examples of existing product patents and organized an interactive activity, prompting all the students to formulate the appropriate, concise and effective titles for the given products. Dr. Agalya emphasized on the advantages in having a patent attributed to one's name, enriching the participants with insights into the significance and benefits of securing intellectual property rights.
