Resource Person: Mr.Raghu Prasad K.S,
                CEO,
                Kaushalya Technical Training and Consultancy Services

Date: 03/05/2024 to 16/05/2024
Time: 2.00 pm to 5.00 pm
Venue: IBM Lab

Tableau is the most popular tools for visualization and data discovery. All users can build and distribute an interactive and shareable dashboard, which describe the variations, trends, and density of the data in the form of graphs and charts. Visualizing the data in a chart or graphical form will increase productivity. The value-added program on Tableau not only enhanced the data visualization and analysis skills of participants but also contributed to the overall data-driven decision-making capabilities.
