

Date	13/09/2024
Event Name	Unlock IP Potential in AI
Details	<p>The Department of Research & Development & Department of Artificial Intelligence and Machine Learning jointly organized a workshop session on “Unlock IP potential in Artificial Intelligence”. The session was conducted by Dr. Agalya V, Head of IPR Cell.</p> <p>The main purpose of the session was to emphasize a systematic approach to identifying potential IP opportunities and converting them into Intellectual Property. During the session, the speaker discussed various categories of patent filing, such as Design, Idea/System, and Grant.</p> <p>The session delivery was wonderful, and the teaching faculties were able to understand how to conceptualize patents regardless of the category. For new faculties, it was an excellent learning experience, and for senior faculties, it served as a refresher.</p> <p>We would like to take this opportunity to thank Dr. V. Revathi, Dean R&D and Dr. N V Uma Reddy, HoD AI&ML for their support to organize this workshop. We also thank Dr. Agalya V, Head of IPR Cell for conducting this brilliant session.</p>
