NEW HORIZON COLLEGE OF ENGINEERING

EVENT NAME: Industry Expert Talk

DATE:24/09/2024

VENUE: A006

BRIEF DESCRIPTION OF THE EVENT:

On the 24th September 2024, Ms. Shilpa delivered an insightful session for the students of the AIML 3rd semester, focusing on the profound impact of Artificial Intelligence (AI) on industries. The session highlighted key technological concepts such as AI neural operations, machine learning, IOT (Internet of Things), and factors contributing to the rapid expansion of IOT. The objective was to provide a comprehensive understanding of how AI and related technologies are reshaping industries and their operational dynamics. Artificial Intelligence has become a transformative force in numerous industries. One of the most integral components of AI is neural operations, which mimic the way the human brain processes information. Neural networks, which are at the heart of AI, consist of interconnected nodes (similar to neurons) that process data in a hierarchical manner to detect patterns, learn, and make predictions.

The session delivered by Ms. Shilpa on the impact of AI on industries provided a comprehensive understanding of how AI, machine learning, and IOT are driving technological advancements across sectors. By leveraging neural operations, machine learning algorithms, and IOT technologies, industries are able to optimize their operations, improve customer experiences, and stay competitive in an increasingly digital world.

ACTIVITIES CONDUCTED: 01

NO. OF PARTICIPANTS: 60

WINNERS (if any, for activities conducted): NIL

GUEST DETAILS (Name, Designation, Organisation, Location) :

Ms. Shilpa S
Entrepreneur
Aariv Technologies
