	Appendix D Bloom’s Taxonomy	94

INSTITUTION

Vision

To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

Mission

To strengthen the theoretical, practical and ethical dimensions of the learning process by fostering a culture of research and innovation among faculty members and students.

To encourage long-term interaction between the academia and industry through their involvement in the design of curriculum and its hands-on implementation.

To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

Quality Policy

To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

Values

- ❖ Academic Freedom
- ❖ Innovation
- ❖ Integrity
- ❖ Professionalism
- ❖ Inclusiveness
- ❖ Social Responsibility

DEPARTMENT OF AI & ML

Vision

To develop an outstanding AI and ML professionals with profound practical, research & managerial skills to meet ever changing Industrial Social and Technological needs of the Society

Mission

To provide strong theoretical foundations and hands-on competence in Artificial Intelligence and Machine Learning, fostering research, innovation, and technical excellence in alignment with industry and national needs.

To establish sustainable academia–industry collaboration for curriculum enrichment, real-time problem solving, internships, and emerging AI technology implementation.

To develop ethically responsible, socially conscious, and environmentally aware AI professionals through holistic learning and active participation in co-curricular and professional activities.

Program Educational Objectives (PEOs)

PEO1	Graduates will build successful careers in Artificial Intelligence and Machine Learning by applying strong theoretical foundations, analytical skills, and modern tools to solve complex industrial and societal problems.
PEO2	Graduates will pursue higher education, research, entrepreneurship, or leadership roles in emerging AI technologies through continuous learning, innovation, and industry collaboration.
PEO3	Graduates will demonstrate ethical responsibility, environmental awareness, and social consciousness while developing and deploying AI solutions for sustainable societal impact.

PEO to Mission Statement Mapping

Mission Statements	PEO1	PEO2	PEO3
To provide strong theoretical foundations and hands-on competence in Artificial Intelligence and Machine Learning, fostering research, innovation, and technical excellence in alignment with industry and national needs.	✓	✓	-
To establish sustainable academia–industry collaboration for curriculum enrichment, real-time problem solving, internships, and emerging AI technology implementation	✓	✓	-
To develop ethically responsible, socially conscious, and environmentally aware AI professionals through holistic learning and active participation in co-curricular and professional activities.	-	-	✓

Program Outcomes (POs) with Graduate Attributes

- P01** **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- P02** **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems in reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- P03** **Design / Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- P04** **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- P05** **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern Engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- P06** **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- P07** **Environment and Sustainability:** Understand the impact of the professional engineering solution in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- P08** **Ethics:** Apply ethical principles and commit to professional ethics, responsibilities, and norms of the Engineering practice.
- P09** **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- P010** **Communication Skills:** Communicate effectively on complex engineering activities with the engineering community and with society, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- P011** **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- P012** **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)

A graduate of the Artificial Intelligence and Machine Learning Program will demonstrate:

PSO1: Ability to design, develop, and deploy intelligent systems using machine learning algorithms, deep learning architectures, data analytics, and AI frameworks to address real-world applications.

PSO2: Ability to analyze large-scale data, interpret model outcomes, and implement responsible, secure, and ethical AI solutions aligned with industry standards and societal needs.

22DMAT31*: This non-credit mandatory course to be offered with only CIE and no SEE to Lateral entry students.

Programming Language Course (PLC)			
22AIM341	Linux Programming	22AIM 343	Programming for IoT
22AIM342	Perl Programming	22AIM 344	Java Script Programming

Ability Enhancement Course–III (all are Laboratory Courses 0-0-1-0)

22AIM351	Problem solving using Prolog	22AIM353	Data Analysis using MSExcel
22AIM352	Python for Data Analytics	22AIM354	Exploratory Data Analysis

National Service Scheme /Physical Education/Yoga: All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE) (Sports and Athletics), and Yoga (YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

Credit Definition:

1-hour Lecture (L) per week=1 Credit
 2-hours Tutorial(T) per week=1 Credit
 2-hours Practical/ Drawing(P) per week=1 Credit
 2-hous Self Study for Skill Development (SDA) per week= 1 Credit

03- Credits courses are to be designed for 40 hours in Teaching-Learning Session
 02- Credits courses are to be designed for 25 hours of Teaching-Learning Session
 01- Credit courses are to be designed for 15 hours of Teaching-Learning Sessions

Mini-project work: Mini Project is a laboratory-oriented/hands on course that will provide a platform to students to enhance their practical knowledge and skills by the development of small systems/applications etc. Based on the ability/abilities of the student/s and recommendations of the mentor. A student can dominate projects as

- (i) A group of 2 if mini project work is single discipline (applicable to all IT allied branches)
- (ii) A group of 2-4 if mini project work is single discipline (applicable to all Core Branches)
- (iii) A group of 2-4 students if the Mini Project work is a multi-disciplinary (Applicable to all Branches)

CIE procedure for Mini-project:

(i) Single discipline: The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two faculty members of the Department, one of them being the Guide. The CIE marks awarded for the Mini-project work shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batchmates.

(ii) Interdisciplinary: Continuous Internal Evaluation shall be group-wise at the college level with the participation of all the guides of the project.

The CIE marks awarded for the Mini-project, shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the percentage ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batchmates.

National Service Scheme /Physical Education/Yoga: All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE) (Sports and Athletics), and Yoga (YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

1-hour Lecture (L) per week=1 Credit
 2-hours Tutorial (T) per week=1 Credit
 2-hours Practical / Drawing (P) per week=1 Credit
 2-hour Self Study for Skill Development (SDA) per week= 1 Credit

03-Credits courses are to be designed for 40 hours in Teaching-Learning Session
 02-Credits courses are to be designed for 25 hours of Teaching-Learning Session
 01-Credit courses are to be designed for 15 hours of Teaching-Learning Sessions

SEMESTER III

MATHEMATICAL FOUNDATION FOR COMPUTING SCIENCES

Course Code	22MAC31	CIE Marks	50									
L:T:P:S	3:0:0:0	SEE Marks	50									
Hrs. / Week	3	Total Marks	100									
Credits	03	Exam Hours	03									
Course outcomes: At the end of the course, the student will be able to:												
22MAC31.1	Use appropriate numerical methods to solve algebraic equations and transcendental equations.											
22MAC31.2	Solve initial value problems using appropriate numerical methods and also Evaluate definite integrals numerically.											
22MAC31.3	Demonstrate the idea of Linear Dependence and Independence of sets in the vector space.											
22MAC31.4	Gain ability to use probability distributions to analyze and solve real time problems											
22MAC31.5	Justify the concept of sampling distribution to solve the engineering problems.											
22MAC31.6	Use the large/small samples to analyse the data to make decision about the hypothesis.											
Mapping of Course Outcomes to Program Outcomes:												
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22MAC31.1	3	3	-	-	-	-	-	-	-	-	-	-
22MAC31.2	3	3	-	-	-	-	-	-	-	-	-	-
22MAC31.3	3	3	-	-	-	-	-	-	-	-	-	-
22MAC31.4	3	3	-	-	-	-	-	-	-	-	-	-
22MAC31.5	3	3	-	-	-	-	-	-	-	-	-	-
22MAC31.6	3	3	-	-	-	-	-	-	-	-	-	-
MODULE-1	NUMERICAL METHODS-1										22MAC31.1	8 Hours
Numerical solution of algebraic and transcendental equations: Regula-falsi method and Newton-Raphson Method- Problems. Interpolation: Newton's forward and backward formulae for equal intervals, Newton divided difference, Lagrange's formula and Lagrange's inverse interpolation for unequal intervals (without proofs)-Problems.												
Case Study	Case study on Numerical Analysis.											
Text Book	Text Book 1: 28.2, 28.3, 29.6, 29.10, 29.11, 29.13, Text Book 2: 19.2, 19.3.											
MODULE-2	NUMERICAL METHODS-2										22MAC31.2	8 Hours
Numerical solution of ordinary differential equations of first order and of first degree: Taylor's series method, Modified Euler's method and Runge-Kutta method of fourth-order-Problems. Milne's predictor and corrector methods-Problems. Numerical integration: Simpson's 1/3 rd rule, Simpson's 3/8 th rule, Weddle's rule (without proofs)-Problems.												
Applications	Application of numerical integration to velocity of a particle and volume of solids.											
Text Book	Text Book 1: 32.3, 32.5, 32.7, 32.9, 30.7, 30.8, 30.10, Text Book 2: 19.5, 21.1.											
MODULE-3	VECTOR SPACES										22MAC31.3	8 Hours
Vector Space definition and examples, Subspaces and Spanning sets, Linear Dependence and Independence, Linear Independence and Spanning Sets, Bases: Orthogonal and Orthonormal bases and Dimension.												
Text Book	Text Book 3: 4.1, 4.2, 4.3, 4.4, 4.5.											
MODULE-4	PROBABILITY AND JOINT PROBABILITY DISTRIBUTIONS										22MAC31.4	8 Hours
Random variables (discrete and continuous), probability density functions, moment generating function. Discrete Probability distributions: Binomial and Poisson Distributions-Problems. Continuous Probability distribution: Normal Distributions-Problems. Concept of joint probability-Joint probability distribution, Discrete and Independent random variables. Expectation, Covariance, Correlation coefficient.												
Case Study	Case study on Distributions.											
Text Book	Text Book 1: 26.8, 26.9, 26.10, 26.11, 26.12, 26.14, 26.15, 26.16.											
MODULE-5	SAMPLING THEORY								22MAC31.5, 22MAC31.6		8 Hours	
Sampling, Sampling distributions, test of hypothesis of large samples for means and proportions, Inferences for variance and proportion. Central limit theorem (without proof), confidence limits for means, Student's t-distribution, F-distribution and Chi-square distribution for test of goodness of fit for small samples.												
Case Study	Case Studies on sampling theory and significant measures of scores.											
Text Book	Text Book 1: 27.2, 27.3, 27.4, 27.5, 27.6, 27.7, 27.8, 27.9, 27.10, 27.11, 27.12, 27.14, 27.15, 27.16, 27.19.											

CIE Assessment Pattern (50 Marks – Theory)

RBT Levels		Marks Distribution

Activity-Based Learning (Suggested Activities in Class)/Practical Based Learning:

- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare Algorithms/Flowcharts/Programming Codes
 - Organizing Group wise discussions on related topics
 - Seminars

DATA STRUCTURE AND ALGORITHMS														
Course Code	22AIM32					CIE Marks					50			
L:T:P:S	3:0:0:0					SEE Marks					50			
Hrs / Week	3					Total Marks					100			
Credits	03					Exam Hours					03			
Course outcomes: At the end of the course, the student will be able to:														
22AIM32.1	Understand the different types of data structures and their implementations													
22AIM32.2	Apply the knowledge of complexity classes P, NP, and NP-Complete and prove certain problems are NP-complete.													
22AIM32.3	Analyze the application-based real-time solutions using Linear and Non-linear Data structure													
22AIM32.4	Design programs for solving real-world problems using appropriate data structures.													
22AIM32.5	Implement various searching and sorting methods to enhance solution efficiency.													
22AIM32.6	Present a case study on a real-world scenario to demonstrate problem-solving using data structures.													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM32.1	2	-	-	-	-	-	-	-	-	-	-	-	-	-
22AIM32.2	3	3	-	-	-	-	-	-	-	-	-	-	3	3
22AIM32.3	3	3	1	-	-	-	-	-	-	-	-	3	3	3
22AIM32.4	3	3	3	3	-	-	-	-	-	-	-	3	2	3
22AIM32.5	3	3	3	3	2	-	-	-	-	-	-	-	3	-
22AIM32.6	3	3	3	1	2	-	-	-	-	-	-	3	3	3
MODULE-1	LINEAR DATA STRUCTURES					22AIM32.1, 22AIM32.3					8 Hours			
Data structures-Linear and non-linear data structures, ADT concept, Linear List ADT, Array representation, Linked representation, singly linked lists -insertion, deletion, search operations, doubly linked lists-insertion, deletion operations, circular linked lists. Application of Linked List.														
Text Book			Text book 1: Chapter:1, 2 Text book 3: Chapter:6											
MODULE-2	HIERARCHICAL DATA STRUCTURES					22AIM32.1, 22AIM32.3					8 Hours			
Queue-Circular queue-Enqueue, Dequeue, Priority queue. Heap-Heap Operation-Binomial Heap-Fibonacci Heaps.														
Applications	Demonstrate on different Queue operation.													
Text Book	Text Book 1: Chapter: 3, 6, 7, 8 Text Book 3: Chapter:8,9,10,11													
MODULE-3	Non-Linear Data Structures-TREE					22AIM32.1, 22AIM32.3,22AIM32.4					8 Hours			
Binary SearchTrees: Basics – Querying a Binary search tree – Insertion and Deletion-. B-Trees: Definition of B -trees – Basic operations on B-Trees – Deleting a key from a B-Tree. Splay Trees: Bottom-Up Splay Tree, Top-Down Splay Trees.														
Text Book	Text Book 2: Chapter: 1, 2, 3, 4, 5, 6, 7, 8, Text Book 3: Chapter:13													
MODULE-4	GRAPHS					22AIM32.1,22AIM32.3,22AIM32.6					8 Hours			
Elementary Graph Algorithms: Representations of Graphs – Breadth-First Search – Depth-First Search. Graph coloring problems, Single-Source Shortest Paths:The Bellman-Ford algorithm – Single-Source Shortest paths in Directed Acyclic Graphs – Dijkstra ‘s Algorithm.														
Case Study	Bi-Connected Graph													
Text Book	Text Book 4: Chapter: 6,7,15, 20													
MODULE-5	Searching, Sorting and Hashing Techniques					22AIM32.1, 22AIM32.3, 22AIM32.5 22AIM32.6					8 Hours			
Searching-Linear Search -Binary Search. Sorting: Bubble Sort- Selection sort- Insertion sort- Shell sort- Radix sort.- Topological sort. Hashing-Hash functions-separate chaining-open addressing-Rehashing. Introduction to NP , NP Complete.														

Case Study	Different type of Hash Functions.	
Text Book	Text Book 2 : Chapter : 1, 2, 3, 4, 5, 7.	Textbook 1: Chapter : 1, 3, 4, 5, 6, 7, 8

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Conduct the classes using Jeopardy Lab
- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to read research papers on Algorithms and have a discussion.
 - Class Presentations

DATA STRUCTURE AND ALGORITHMS LAB

Course Code	22AIL32	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	50
Hrs / Week	3	Total Marks	100
Credits	01	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIL32.1	Implement linear and non-linear data structures using link list.
22AIL32.2	Design various data structures such as stacks, queues, trees, graphs, Heap etc to solve various computing problems.
22AIL32.3	Apply various searching and Hashing Techniques to real time problem.
22AIL32.4	Employ an appropriate data structure and algorithm to address a real-world problem, demonstrating effective problem-solving skills.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22AIM33.6	3	3	3	-	-	-	-	-	-	-	-	2	3	2
MODULE-1 INTRODUCTION TO JAVA 22AIM33.1 8 Hours														
Basics of Java programming - Dissecting the "Hello, World" Program, Compiling and Running a Java Program, Data types, Variables, Operators, Control structures including selection, Looping, Java methods, Math class, Arrays in java.														
Text Book Text Book1:1,2,3,4,5														
MODULE-2 CLASSES AND OBJECTS 22AIM33.1,22AIM33.2 8 Hours														
Implementing Classes, Object Construction, working with Objects, Static Variables and Methods, Constructors, Overloading Methods, Inbuilt classes like String, Character, String Buffer, this reference, nested classes.														
Applications Object Oriented Programming Applications.														
Text Book Text Book1:6,15														
MODULE-3 INHERITANCE AND POLYMORPHISM 22AIM33.2 8 Hours														
Inheritance and types, Super and subclass, Overriding, Polymorphism, Dynamic binding, Casting objects, Instance of operator, Abstract class, Interface, Package, Object class.														
Case Study Inheritance: Hybrid														
Text Book Text Book2:8,9														
MODULE-4 EXCEPTION HANDLING and MULTITHREADED PROGRAMMING 22AIM33.3,21AIM33.4 8 Hours														
Exception Types, Uncaught Exceptions, using try and catch, Multiple catch clauses, Nested try statements, throw, throws, finally, Java's Built-in Exceptions. Threads: The java Thread Model, Main Thread, creating a Thread, creating multiple Threads, Thread Priorities, Synchronization, inter thread Communication, Suspending, resuming and Stopping Threads using Multithreading.														
Text Book Text Book1:10,11														
MODULE-5 I/O BASICS AND COLLECTION FRAMEWORK 22AIM33.5,22AIM33.6 8 Hours														
Reading input, writing output, Reading and Writing Files, The Collections Framework: Collections Overview, The Collection Interfaces- The List Interface, The Set Interface, The Queue Interface, The Collection Classes – ArrayList Class, Linked List Class.														
Case Study Generic Programming: Generic Classes and methods														
Text Book TextBook2:17

MODULE-1	LINUX OS AND GENERAL-PURPOSE UTILITIES COMMANDS				22AIM341.1				8 Hours						
LINUX Operating System: Introduction, LINUX architecture, Features of LINUX operating system General Purpose Utilities: passwd, who, tty, lock, stty, script, clear and tput with options, uname with options, date with options, cal, calendar, bc, man, echo, script, passwd, historyandalias															
LaboratoryComponent:															
1. Execute the following commands with options(ifany) Date with all options, cal, calender, who, whoami, tty, stty, clear and tput															
2. Execute the following commands with options (ifany) Man, echo, whatis, Unamewith alloptions															
3. Execute the following commands, bc with scale factor, using bc convert from one base to another Base (eg. Binary to decimal, decimal to octal, decimal to hexa etc), password, history, alias and script															
Self-study		Procedure to Install ubuntu on windows system													
Text Book1		Text Book1:1.1,1.2,1.10,1.11,2,1to 2.15													
MODULE-2	FILE SYSTEM AND FILE HANDLING COMMANDS				22AIM341.2,22AIM341.4				8 Hours						
File System and Attributes: Introduction to LINUX filesystem, inode, FileTypes, FileAttributes, Application program Interface to Files, LINUX kernel support for files															
File Handling Commands: ls, cat, cp, mv, rm, wc, od, printf, pwd, mkdir, rmdir, cd, file and directory permissions-chmod, file ownership-chown, chgrp, umask, tar, gzip, du, df, find, file modification and access times and touch command															
Laboratory Component:															
1. Execute ls command and display all the attribute of the file with all options, display the content of the file, copy and move the file from one place to another, remove the file															
2. Execute the following directory related commands.															
3. (i)create the directory, change the directory, print the current directory, display the disk space usage, compress the contentof the file and archive the file															
4. Identify the commands used to change the permission of the user, group and others using symbolic octal, absolute formats, create the file using touch command, modify the access time and modification time, change the default permission of the fileor directory using umask															
Text Book		Text Book1:3.1 to 3.25,4.1 to 4.11 Text Book2:6.1 to 6.9													
MODULE-3	SIMPLE FILTER AND REGULAR EXPRESSIONS				22AIM341.3, 22AIM341.4				8 Hours						

Simple filters and Regular Expressions: more, wc with options, od with options, pr, cmp, diff, comm, head, tail, cut, paste, sort, tr, uniq, nl, grep–searching for a pattern, grep options, regular expressions, egrep and fgrep

LaboratoryComponent:

1. Create a student database of 10 records with five fields and use the following commands on the database to display the records accordingly
(i) Head, tail, cut, paste, sort, uniq, tee, nl and tr with all possible options
2. Create the student/employee database with 5 fields and apply the grep command with all options to display the pattern or records using regular expressions
3. Create the 3 different sorted files with some duplicate records and apply cmp, Diff and comm commands to compare the file contents, count the words, characters and lines using wc command

Text Book1 | TextBook1: 9.1, 9.13, 10.1 to 10.5

MODULE-4 | **PROCESS** | **22AIM341.5** | **8 Hours**

Process: Process, LINUX kernel support for processes, process attributes, process table, viewing processes – ps, system processes, starting new processes, waiting for a process, killing a process, zombie processes, orphan process, running jobs in background, nohup, job execution with low priority-nice, schedule execution of one or more command at specified time-at and batch, run jobs periodically-cron introduction to fork, vfork, exit, wait, waitpid, exec and sleep system calls

LaboratoryComponent:

1. Display the user process and system processes and kill the process using process ids
2. Identify and use the command to execute the jobs in foreground and background at the same time
3. Execute the following commands nice, nohup, at, batch and cron

Self-study | 1.Usage of fork, vfork, wait and ait pid 2. Create zombie process

Text Book | Text Book1:7.1 to7.13 | Text Book2:8.1

MODULE-5 | **SHELL PROGRAMMING** | **22AIM341.6** | **8 Hours**

Shell Programming: Shellvariables, shellscripts, read, positional parameters, exitstatus, logical operators, exit, if conditional, test and [], case, expr, sleepand wait, while, until and for, base name

LaboratoryComponent:

1. Write a shell script that takes pattern and file name as input from the user to search a string in the file
2. Write a shell script which will accept a filename, starting linenummer, ending line numbers from the user and displays those lines fromthe givenfile.
3. Write a shell script which displays a list of all the files in the current directory to which you have read, write and execute permissions
4. Write a shell script which gets executed the moment the user logs in. It should display the message, “ Good Morning”, “Good Afternoon”,“Good Evening”, depending upon the time at which the user logs in.

MODULE-1	Introduction to Perl: Basics					22AIM342.1					8 Hours				
Introduction-Single line comments-multi-line comments-variable: Scalars-Array References-Scalar References-Arrays-Type globs-type globrefs-file handles and constants-Sigils-Hash References-Hashes-Operators-DataTypes															
LaboratoryComponent:															
<ol style="list-style-type: none"> 1. Write a simple program to find circle circumference using scalars variables. 2. Write a program for converts between numbers and string on the fly. 3. Write a program to print array of elements. 4. Write a program using Type globs and type glob. 5. Write a program using sigils. 6. Write a program using Hashes. 															
Text Book		Text Book1:Ch1,2,3													
MODULE-2	Loops and control statements					22AIM342.2					8 Hours				
Conditionals-Loops-Subroutines: Creating sub-routines-Sub-routine arguments are passed by reference.															
LaboratoryComponent:															
<ol style="list-style-type: none"> 1. Write a simple program using conditional statement to precede or succeed the code to be executed. 2. Write a program to print sum of integers using for loop statement. 3. Write a program using do-until statements for check the number is prime or not. 4. Write a program for swap two numbers using subroutine. 															
Text Book		Text Book1:Ch7,8													
MODULE-3	List and Debug Output					22AIM342.3					8 Hours				
Debug Output: Dumping with style-Dumping data-structures-Data: show-Dumping arraylist-Lists-Array as list-Assigning a list to a hash-Lists can be passed into subroutines-Return list from subroutine-Hash as list-using array ref to pass array to sub															
LaboratoryComponent:															
<ol style="list-style-type: none"> 1. Write a program to display the output in specified format using Data: Show method. 2. Write a program to display arraylist value using Dumper. 3. Write a program to pass list to subroutine. 4. Write a program to getlist elements from subroutine. 															

Self-study/	Command line arguments			
Text Book	Text Book1; Ch 9,10			
MODULE-4	Sort and FileI/O	22AIM342.4	8 Hours	
The Basic Lexical Sort-The SchwartzanTransform-CaseInsensitiveSort-NumericSort-Opening a file handle for reading-Reading from a file-Write to a file-Use auto die-Rewind a file handle-Reading and writing Gzip compressed files.				
LaboratoryComponent:				
<ol style="list-style-type: none"> 1. Write a program to sort elements using Lexical sort. 2. Write a program to write content into a file using a utidie function. 3. Write a program to read and write from/to compressed file. 4. Write a program using perl to wind a file handle method 				
Self-study/	System Programming.			
Text Book	Text Book1:Ch11 and12			
MODULE-5	Object Oriented Perl	22AIM342.5,22AIM342.6	8 Hours	
Defining class edin modern perl-Creating Objects-Defining Classes-Inheritance and methods resolution-Class and Object methods.				
LaboratoryComponent:				
<ol style="list-style-type: none"> 1. Create a class and object using perl 2. Implement inheritance concept using perl 3. Write a program for methods resolution using perl. 				
Self-study	Perl Symbol Table.			
Text Book	Text Book1:Ch16.

22AIM343.6	3	3	3	3	3	-	-	-	-	-	-	-	2	3	
MODULE-1	INTRODUCTION TO IoT									22AIM343.1			8 Hours		
Microprocessor, Microcontroller, EmbeddedSystem, Definition of IoT, Characteristics of IoT, Physical design of IoT, Logical design of IoT, IoT Enabling Technologies, IoT levels &Deployment Templates, IoT Applications.															
LaboratoryComponent:(minimum3experiments/programs)															
1) Install IDE of Arduino and write a program using Arduino IDE to blink LED.															
2) Interface LED and buzzerwith Arduinotobuzz for a period of time.															
3) Interface RGB LED with Aurdino to obtain different colours and brightness using PWM.															
TextBook Text Book 1- Ch-2,3; Text Book 3- Ch- 1,2,3															
MODULE-2	IOT WITH ARDUINO									22AIM343.2			8 Hours		
Introduction to the Arduino, creating an Arduino programming Environment, Using the Arduino IDE, Creating an Arduino program, Using Libraries, Working with Digital Interfaces, Interfacing with Analog devices, Adding Interrupts, communicating with devices, using sensors, Working with Motors, Using an LCD.															
LaboratoryComponent:															
1) a) Control a servo motor using Arduino with an input given through a push button (e.g: When the pushbuttonis pressedthe servo motorhasto rotate by15 degrees).															
b) Rotate Stepper motor either clockwise or anticlockwise at ‘n’ number of steps using Arduino.															
2) Write a program to read the data from the RFID tag and display the information on the display board using Arduino and control LED (e.g: if it is a valid card then the LED should be ON otherwise OFF).															
3) Control any two actuators connected to the Arduino using Bluetooth/Wifi.															
Text Book Text Book 2-Ch-1,2															
MODULE-3	IOT SENSORS AND ACTUATORS									22AIM343.3, 22AIM343.4			8 Hours		
Introduction, Sensor, Types of Sensors, Actuators, classification of Actuators.															
Technologies used in IoT: Bluetooth, Bluetooth Low Energy (BLE), WiFi, LiFi, Cellular Networks, Z-Wave, X-10, Sigfox, ZigBee, LoRaWAN, 6LowPAN, 5-G, LPWAN, RFID and NFC, WSN, Communication Protocols: CoAP, MQTT, XMPP, DDS, AMQP, REST, HTTP.															
Laboratory Component:															
1) Interface analog/digital sensors with Arduino and analyse the corresponding readings. (Sensors like temperature, alcohol, humidity, pressure, gas, sound pollution, level, weight, flow, proximity, LDR, PIR, pulse, vibration, sound)															
2) Demonstration of setup & working of RaspberryPi. (Students have to prepare the report for the same).															
3) Interface RGB LED with Raspberry Pi to obtain different colours and brightness using PWM.															
Text Book Text Book 3-Ch -5,6															
MODULE-4	IoT WITH RASPBERRY PI									22AIM343.5			8 Hours		

PHYSICAL DEVICES&END POINTS: RaspberryPi, About the Board, Linux on RaspberryPi, RaspberryPi Interfaces, Programming RaspberryPi with Python, Controlling LED with RaspberryPi, Interfacing a LED and Switch with RaspberryPi, Interfacing a Light Sensor.

LaboratoryComponent:

- 1) a) Interface an ultrasonic sensor with Raspberry pi to print distance readings on the monitor when the sensor changes its position.
b) Reading the data from an analog sensor with Raspberry using Arduino serial portorADCMCP3208 usingSPI.
- 2) Post/read the data to/from the cloud viaMQTT broker with a RaspberryPi.
- 3) Send real-time sensor datato a smart phone using RaspberryPi on board Bluetooth

Text Book Text Book 1-Ch 4,5

MODULE-5 **ASSOCIATED IOT TECHNOLOGIES** 22AIM343.6 **8 Hours**

Python Packages for IoT, WAMP-Auto BahnforIoT, Python Web Application Frame work–Django, Amazon Web Services for IoT, SkyNet IoT messaging platform.

LaboratoryComponent:

- 1) Interface Pi camera module using Raspberry Pi toper form operations of PiCamera-API or Open CV library.
- 2) Implement an intruder alert system that alerts through email
- 3) Implement remote monitoring of smoke alarm systems using Raspberry Pi.

Text Book Text Book 1-Ch-3,4

JAVA SCRIPT PROGRAMMING															
Course Code	22AIM344					CIE Marks	50								
L:T:P:S	2:0:1:0					SEEMarks	50								
Hrs/Week	4					TotalMarks	100								
Credits	03					ExamHours	03								
Course out comes: At the end of the course, the student will be able to:															
22AIM344.1	Understand the context and rationale for using HTML versus XHTML														
22AIM344.2	Apply the concepts of HTML, XHTML to construct the web pages														
22AIM344.3	Examine various attributes, values and types of CSS														
22AIM344.4	Analyse event handling mechanisms of Java Script.														
22AIM344.5	Evaluate the dynamic documents using Java Script.														
22AIM344.6	Design a responsive, and visually appealing websites using advanced CSS techniques														
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	
22AIM344.1	2	-	-	-	-	-	-	-	-	-	-	-	-	-	
22AIM344.2	3	-	-	-	-	-	-	-	-	-	-	-	3	2	
22AIM344.3	3	3	3	-	-	-	-	-	-	-	-	-	3	2	
22AIM344.4	3	3	3	2	-	-	-	-	-	-	-	-	3	2	
22AIM344.5	3	3	3	3	-	-	-	-	-	-	-	-	3	2	
22AIM344.6	3	3	3	3	3	-	-	-	-	-	-	3	3	2	
MODULE-1	Introduction to HTML					22AIM344.1					8 Hours				
HTML and XHTML: Origins of HTML and XHTML, Basic syntax, Standard XHTML document structure, Basic text markup, Images, Hypertext Links, Lists, Tables. Forms, Syntactic differences between HTML and XHTML. CSS: Introduction, Levels of style sheets, Style specification formats, Selector forms, Property value forms, Font properties, List properties, Color, Alignment of text, Background images, tags.															
Laboratory Component: (minimum 3 experiments/programs)															
1. Design simple calculator using HTML and CSS															
2. Design a registration form using HTML and CSS. Include Image in the form.															
3. Illustrate 3 levels of CSS style sheets.															
Text Book Text Book 1: 2.1 to 2.10, 3.1 to 3.12															
MODULE-2	Introduction to Java Script:					22AIM344.2					8 Hours				
History of JavaScript, Js Introduction, Hello World Web Page, Buttons, Functions, Variables, Identifiers, Assignment Statements form Element, Controls, Text Control, accessing a Form's Control Values, reset and focus Methods, Event-Handler Attributes.															
Laboratory Component: (minimum 3 experiments/programs)															
1. Write a JavaScript Program to Print Hello World.															
2. Write a javascript program to change html content dynamically															
3. Write a JavaScript Program to Find the Factorial of a Number.															
4. Write a JavaScript code that displays text "TEXT-GROWING" with increasing font size in the interval of 1000ms in RED COLOR, when the font size reaches 50pt it displays "TEXT-SHRINKING" in BLUE color. Then the font size decreases to 5pt.															
Text Book Text Book 2: 8.1 to 8.18															
MODULE-3	Java Script Essentials					22AIM344.3					8 Hours				
Window Object, alert and confirm Methods, prompt Method, Strings, Arithmetic operators, Math Object Method, Parsing Numbers, Constraint Validation for Form Controls.															
Laboratory Component:															
1) Write a POPUP Message Program Using Event.															
2) Display Alert for Prompt Message Program.															
3) Check whether a string contains a substring.															
Text Book Text Book 2: 9.2 to 9.16															
MODULE-4	The Basics of Java Script					22AIM344.4					8 Hours				
Control statements, Object creation and Modification; Arrays; Array methods, Array sort, JS date formats. Functions; Errors, Element access in Java Script.															

Laboratory Component:				
1. Program to convert an array to string.				
2. Program to illustrate JavaScript date objects.				
3. Write a program to remove the last element from an array.				
Text Book	Text Book 1: 4.6 to 4.14			
MODULE-5	Loops, Additional Controls, Manipulating CSS with JavaScript	22AIM344.5, 22AIM344.6	8 Hours	
While Loop, External JavaScript Files, Radio Buttons, Checkboxes, Manipulating CSS with JavaScript, Text area Controls, Pull-Down Menus, List Boxes.				
LaboratoryComponent:				
1) Implement a web design that uses buttons and text area controls.				
2) Creating a simple and easy dropdown list without using JavaScript code and CSS stylesheet.				
3) Javascript to display the square and cube of n numbers in a table.				
Text Book	Text Book 2:10.2 to 10.16

PROBLEM SOLVING USING PROLOG

Course Code	22AIM351	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	50
Hrs/Week	2	Total Marks	100
Credits	01	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM351.1	Apply the basic concept of PROLOG programming language.
22AIM351.2	Design an expert system using recursion in PROLOG
22AIM351.3	Examine the use of appropriate operators for problem solving.
22AIM351.4	Develop an application program using the control structures to manipulate list data structure and File handling in PROLOG programming

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM351.1	3		-	-		-	-	-			-	-	3	3
22AIM351.2	3		-	-		-	-	-			-	-	3	3
22AIM351.3	3	3	3	-		-	-	-			-	-	3	3
22AIM351.4	-3	3	3	3	3	-	-	-			-	-	3	3

Pgm. No.	List of Experiments / Programs	Hours	COs
----------	--------------------------------	-------	-----

Prerequisite Experiments / Programs / Demo

	Basics of Expert system and C Programming	2	NA
--	--	----------	-----------

PART-A

1	Develop a program to print “Hello world. Welcome to Prolog Programming” in two different line using PROLOG functional Programming concepts. Note: Discuss the Logic and functional programming concepts.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
2	a. Create a sample knowledge base and execute queries for it. b. Write a program to illustrate Family Relations in Prolog. Note: Discuss the Knowledge base, Relations-Family Relations concepts	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
3	a. Write a program to demonstrate arithmetic operations in Prolog. b. Develop a program to demonstrate the comparison operators in Prolog. Note: Discuss Data Objects, Atoms and Anonymous Variables.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
4	Develop a program in Prolog for OR and AND logic. Note: Discuss about the properties of Conjunctions and disjunction properties.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
5	Write a program in Prolog to prints 1 to 25 prime numbers using loop concepts. Note: Discuss the syntax of looping and Decision-Making statements.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
6	Write a program using if then else statement to find the greatest among three numbers.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4

Part B

7	Write a program to create a list and perform length calculations, concatenation, deletion and append items in it using Prolog. Note: Discuss List manipulation Functions in Prolog.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
8	Write a program to implement write (), read () and tab () predicate in Prolog. Note: Discuss the concepts of File Handling and Predicate in Prolog.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4

9	Develop a Prolog code that can read data from file and write data into it.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
10	Develop a program in Prolog to demonstrate Atoms using predicates. Note: Discuss about constructing Atoms.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
11	Write a program to create a file and read the data from console and write into file then perform append operation in same file using Prolog.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4
12	Create a simple expert system application using Prolog programming.	2	22AIM351.1 22AIM351.2 22AIM351.3 22AIM351.4

--	------------------------------------	---	----

PART-A

1	a. Develop a python program to demonstrate data types and conversion from one data type to another. b. Write a python program to demonstrate list operations: a) Create b) append c) reverse d) indexing e) slicing. Note: Discuss the datatypes and list concepts.	2	22AIM352.1
2	Write a python program to demonstrate operations on dictionary: a) create b) append c) print key and values d) update Note: Discuss the Dictionary concepts and difference between list and dictionary.	2	22AIM352.1
3	a. Write a python program to create a NumPy array and perform array manipulation operations b. Write a python program for importing and exporting Data in Python Note: Discuss the NumPy Array and different data file formats.	2	22AIM351.1
4	a. Write a python program for creating data frames using pandas b. Write a python program to plot a graph using Matplotlib. Note: Discuss the data frames in panda and Matplotlib library.	2	22AIM351.1
5	Write a python program to perform the following operations a) sum b) mean c) standard deviation	2	22AIM352.2
6	Write a program in Python to implement to identify and Handle Missing Values. Note: Discuss the Basic of data cleaning, Outlier Identification and Removal, How to Mark and Remove, Missing Data, Statistical Imputation.	2	22AIM352.2 22AIM352.3

Part B

7	Develop a python program to perform Data Normalization and Standardization for the given dataset. Note: Discuss about the data transforms and Rescale data standardize data, Normalize data.	2	22AIM352.2 22AIM352.4
8	Develop a python program to implement basic data pre-processing steps for the given dataset.	2	22AIM352.2 22AIM352.4

9	Write a python program to calculate Skewness and Kurtosis for the given data frame. Note: Discuss the Skewness and Kurtosis–Box Plots–Pivot Table – ANOVA, Hypothesis Testing.	2	22AIM352.3
10	Write a python program to demonstrate features selection using ANOVA Note: Discuss the Skewness and Kurtosis–Box Plots–Pivot Table – ANOVA, Hypothesis Testing.	2	22AIM352.3
11	Write a python program for Plot a Heat map to find the correlation for the given dataset. Note: Discuss about the Heat Map Correlation Statistics.	2	22AIM352.4
12	a. Develop a regression model for house price prediction dataset and evaluate its performance using Python. b. Develop a classification model for iris dataset using Python. c. Plot confusion matrix for any classification model using Python.	2	22AIM352.4

PART-C

Pgm	List of Experiments / Programs	Hrs	COs
	Prerequisite Experiments / Programs / Demo		
	N/A		N/A

Part A

1	The data below represent information on bank customers at 4 branch locations, their deposits at the branch, and the percent of the customers over 60 years of age at the branch. Create graphs that show: (1) line graph for the series No. Customers and \$ Deposits for the various branches and (2) pie graphs for each quantitative series. Finally, consider how to create a graph that incorporates all the quantitative series (hint: bubble graph). Branch No. customers \$ Deposits Percent of customers over 60 years of age A 1268 23,452,872 0.34 B 3421 123,876,985 0.57 C 1009 12,452,198 0.23 D 3187 97,923,652 0.41 8..	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
2	You read in a newspaper article that a Russian scientist has announced that he can predict the fall enrollment of students at Inner Mongolia University (IMU) by tracking last spring's wheat harvest in metric tons in Montana, USA. (a) What are the scientist's independent and dependent variables? (b) You are dean of students at IMU, so this announcement is of importance for your planning. But you are skeptical, so you call the scientist in Moscow to ask him about the accuracy of the model. What measures of fit or accuracy will you ask the scientist to provide?.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
3	What is a single annual payment for the PMT () function for the following data: 6.75% annual interest rate; 360 months term; and \$100,000 principal?	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
4	Draw a Process Flow Map of your preparation to leave your home, dormitory, or apartment in the morning. Use a rectangle to represent process steps like, brush teeth, and diamonds to represent decisions, like wear warm weather clothes (?).	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
5	Create a diagram of a complex decision or process of your choice by using the structure of an influence diagram	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
6	Create a simple simulation that models the toss of a fair coin. Test the results (% Heads/% Tails) for sample sizes of 5, 10, 30, and 100. Hint-Use the RAND() function.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4

Part B

7	For a given data, create a chart using Pivot Table.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
8	Create a report with a custom column and interactive filter.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4

9	Two uncertain events are related. The first event occurs and effects the second. The first event has a 35% chance of an outcome we will call small, and 65% chance of a large outcome. If the first outcome is small then the second event will result in equal chances of 3, 4, 5, and 6, as outcomes; if the first event is large then the second event has equal chances of 11, 13, 14, and 15, as outcomes. Create a simulation that provides a risk profile of outcomes. The simulation should replicate the experiment a minimum of 300 times	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
10	Create a VLOOKUP that: (a) Allows a user to enter a percent (0–100%) and returns a categorical value based on the following data: 0–30% 31–63% 64–79% 80–92% 93–100% A B C D E (b) For the same data above, create a VLOOKUP that returns a categorical value for a randomly generated %. Hint-Use the RAND() function. (c) Expand the table so that the category A and B is defined as Good, C as OK, and D and E as Terrible. With this new, three row table, return the new outcomes (Good, etc.) for exercise (a) and (b) above	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
11	A coffee shop opens in a week and is considering a choice among several brands of coffee, Medalla de Plata and Startles, as their single offering. They hope their choice will promote visits to the shop. What are the treatments and what is the response variable.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4
12	a. What does the Chi-square test of independence for categorical data attempt to suggest? b. Sampling errors can occur naturally, due to the uncertainty inherent in examining less than all constituents of a population—T or F?. c. sample mean is an estimation of a population mean—T or F?.	2	22AIM353.1 22AIM353.2 22AIM353.3 22AIM353.4

EXPLORATORY DATA ANALYSIS

Course Code	22AIM354	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	50
Hrs /Week	2	Total Marks	100
Credits	01	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM354.1	Demonstrate the techniques and packages in Python for Exploratory Analysis
22AIM354.2	Apply the concepts of descriptive statistics for data preparation.
22AIM354.3	Examine appropriate methods for data wrangling.
22AIM354.4	Analyse the significance of correlation and data distribution.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22AIM354.4	3	3	3	-	-	-	-	-	-	-	-	-	3	3

Pgm. No.	List of Experiments / Programs	Hours	COs
----------	--------------------------------	-------	-----

Prerequisite Experiments / Programs / Demo

	Introduction to Descriptive Statistics and Python packages	2	NA
--	---	----------	-----------

Part A

1	a. Write a simple program using NumPy. b. Write a data manipulation using Pandas Note: Discuss the NumPy and Pandas Libraries.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
2	Write a program to visual sample data using Matplot lib. Note: Discuss about MatPlot library.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
3	Draw a Bubble chart and Bar Chart for sample data using Python . Note: Discuss the charts available in Python for visualize the data.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
4	Draw a Lollipop chart and Polor chart for sample data using python.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
5	Create a python program to choose the best chart among others.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
6	Develop a python program to load a CSV file and converting date.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4

Part B

7	Write a python program to removing NaN values. Note: Discuss the Removing NaN values.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
8	Write a program for data refactoring and dropping columns using python.		22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4

9	Write a python program for data refactoring and dropping columns using python. Note: Discuss the Applying descriptive statistics-Data refactoring - Dropping columns	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
10	a. Write a program to merge the data-frames using python. b. Write a program to perform data deduplication and replacing values using python. Note: Discuss the data frames-merging on index-resaping and pivoting, data deduplication-Replacing values-handling missing data-outlier detection and filtering	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
11	Write a program to detect outlier and filtering.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4
12	a. Write a program to calculating percentiles using Kurtosis. b. Write a program to visualizing quartiles using python. c. Write a program to group datasets using group by () functions. Note: Discuss the distribution techniques.	2	22AIM354.1 22AIM354.2 22AIM354.3 22AIM354.4

- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare Handouts
 - Organizing Group wise discussions on use-cases.

BIO INSPIRED DESIGN AND INNOVATION

Course Code	22BIK36	CIE Marks	50
L:T:P:S	3:0:0:0	SEE Marks	50
Hrs / Week	3	Total Marks	100
Credits	03	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22BIK36.1	Verify the biomimetics principles in relation to the needs at that moment.
22BIK36.2	Evaluate the Bio-material properties for health care applications.
22BIK36.3	Investigate novel bioengineering initiatives by evaluating design and development principles.
22BIK36.4	Investigate creative biobased solutions for socially vital issues with critical thought.
22BIK36.5	Understand the bio computing optimization through research and experiential learning.
22BIK36.6	Explain the fundamental biological ideas through pertinent industrial applications and case studies.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22BIK36.1	3	3	3	3	2	-	2	-	1	-	-	2
22BIK36.2	3	3	3	3	2	-	2	-	1	-	-	2
22BIK36.3	3	3	3	3	2	-	2	-	1	-	-	2
22BIK36.4	3	3	3	3	2	-	2	-	1	-	-	2
22BIK36.5	3	3	3	3	2	-	2	-	1	-	-	2
22BIK36.6	3	3	3	3	2	-	2	-	1	-	-	2

MODULE-1 BIO-INSPIRED DESIGN AND ENGINEERING 22BIK36.1 8 Hours

Bio-Inspired Engineering and design, History, Evolution, Basics of Biomimetics and other Disciplines, Rawling's Classifications, Need for Bio-Inspired Designs. Bio inspired Additive manufacturing techniques, (self-healing, self-assembly).

Self-study / Case Study / Applications Investigate the Challenges of Bio inspired design, Compare with traditional areas of science and engineering.

Text Book Text Book 1: 1.2, 1.3, 1.4, 1.13, 1.15, 1.16

MODULE-2 BIO MATERIALS AND BIO HEALTHCARE DESIGN 22BIK36.2 8 Hours

Biomaterials, Design of Forms- (Hexagonal unit cells, Intrinsic disorder, anisotropy), Design of materials- (Hierarchy, fracture tough materials, structural colours, Actuating Materials, Bio-Compatible Materials). Bio-Mechanics, Applications of Biomaterials and Bio systems in Health care design (Human Prosthetics, Parasitic Wasp-Inspired Needle, Octopus-Inspired Sucker for Tissue Grafting, Peacock-Inspired Biosensors, Gecko-Inspired Surgical Glue) Robotics, Marine and Aeronautical.

Self-study / Case Study / Applications Investigate Bio-Compatible alloys and polymers for human implants and health care applications.

Text Book Text Book 1: 2.2, 2.3, 2.4 to 2.15

MODULE-3 BIO SUSTAINABLE DEVELOPMENT 22BIK36.3, 22BIK36.4 8 Hours

Innovations in Energy (Termite mound inspired shopping malls), Innovations in Resource-Air (purification, filtration), Dew water collection systems, water purification, desalination, Management of spaces, designs for megastructures.

Self-study / Case Study / Applications Explore the Bio inspired environmental constructions and development.

Text Book Text Book 2: 3.1, 3.3, 3.5, 3.7, 3.10

MODULE-4 BIO COMPUTING AND OPTIMISATION 22BIK36.5 8 Hours

No Free Lunch Theorem, Bat Algorithm, Flower Pollination Algorithm, Genetic Algorithm- Crossover and Mutation Operations. Bio-Inspired Optimisation, Ant Colony Optimisation (ACO), Swam Intelligence- Particle Swam Optimisation (PSO).

Self-study / Case Study / Applications Scrutinize the Different types of Optimization techniques, genetic research.

Text Book Text Book 1: 6.1, 6.3, 6.5, 6.7, Text Book 2: 10.1, 10.3, 10.5, 10.7

MODULE-5	APPLICATIONS OF BIO-INSPIRED INNOVATIONS	22BIK36.6	8 Hours
-----------------	---	------------------	----------------

Bioinspired innovations in– Automotive, Automation, Materials and Manufacturing, Sensors, Controllers, Communications, Healthcare, Agriculture, food production, and Sports, Environment infrastructure. Carbon Neutral Solutions (Coral Reefs, Eco-cements), Carbon Free Solutions (Lotus leaf inspired paints), eco-restorations (Eco-friendly pesticide).

Self-study / Case Study / Applications	Survey on Bio inspired Innovations, design, applications and case studies of the same.
--	--

Text Book	Text Book 2: 12.1 to 12.10

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Presenting students with bio-inspired design challenges and asking them to come up with solutions.
- Create physical models or prototypes that mimic biological structures or functions.
- Organizing Group wise discussions on issues
- Seminars

SOCIAL CONNECT AND RESPONSIBILITY

Course Code	22SCK37	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	--
Hrs / Week	02	Total Marks	50
Credits	01	Exam Hours	02

Course outcomes: At the end of the course, the student will be able to:

22SCK37.1	Communicate and connect to the surrounding
22SCK37.2	Understand the needs and problems of the community and involve them in problem –solving
22SCK37.3	Develop among themselves a sense of social & civic responsibility and utilize their knowledge in finding practical solutions to individual and community problems
22SCK37.4	Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22SCK37.1	-	-	-	-	-	3	2	-	2	3	-	1
22SCK37.2	-	-	-	-	-	3	2	-	2	3	-	1
22SCK37.3	-	-	-	-	-	3	2	-	2	3	-	1
22SCK37.4	-	-	-	-	-	3	2	-	2	3	-	1

MODULE-1	PLANTATION AND ADOPTION OF A TREE	22SCK37.1, 22SCK37.2	3 Hours
-----------------	--	---------------------------------	----------------

Plantation of a tree that will be adopted for three years by a group of B. Tech students. (ONE STUDENT ONE TREE) They will also make an excerpt either as a documentary or a photo blog describing the plant's origin, its usage in daily life, its appearance in folklore and literature -- Objectives, Visit, case study, report, outcomes.

MODULE-2	HERITAGE WALK AND CRAFTS CORNER	22SCK37.2, 22SCK37.3	3 Hours
-----------------	--	---------------------------------	----------------

Heritage tour, knowing the history and culture of the city, connecting to people around through their history, knowing the city and its craftsman, photo blog and documentary on evolution and practice of various craft forms- Objectives, Visit, case study, report, outcomes.

MODULE-3	ORGANIC FARMING AND WASTE MANAGEMENT	22SCK37.3, 22SCK37.4	3 Hours
-----------------	---	---------------------------------	----------------

Usefulness of organic farming, wet waste management in neighboring villages, and implementation in the campus – Objectives, Visit, case study, report, outcomes.

MODULE-4	WATER CONSERVATION	22SCK37.3, 22SCK37.4	3 Hours
-----------------	---------------------------	---------------------------------	----------------

Knowing the present practices in the surrounding villages and implementation in the campus, documentary or photoblog presenting the current practices – Objectives, Visit, case study, report, outcomes.

MODULE-5	FOOD WALK	22SCK37.1, 22SCK37.4	3 Hours
-----------------	------------------	---------------------------------	----------------

City's culinary practices, food lore, and indigenous materials of the region used in cooking – Objectives, Visit, case study, report, outcomes.

CIE Assessment Pattern (50 Marks – Activity based) –

- Each module is evaluated as given below and 100 marks in scaled down to 50 as final marks.

CIE component for each module	Marks
Field Visit, Plan, Discussion	10
Commencement of activities and its progress	20
Case study-based Assessment Individual performance with report	20
Module wise study & its consolidation 5*5 = 25	25
Video based seminar for 10 minutes by each student at the end of semester with Report. Activities 1 to 5, 5*5 = 25	25
Total	100

- Implementation strategies of the project (NSS work).
- Individual student has to submit a final report which should be signed by NSS Officer, the HOD and Principal.
- Finally, the consolidated marks sheet and the reports should be available in the department. .

Activity-Based Learning / Practical Based learning

- Platform to connect to others and share the stories with others:
 - Jamming session
 - Open mic
 - Poetry
- Share the experience of Social Connect.
- Exhibit the talent like playing instruments, singing, one-act play, art-painting, and fine art.

Pedagogy:

- The students will be divided into groups. Each group will be handled by faculty mentor.
- A total of 40 - 50 hrs engagement in the semester
- Faculty mentor will design the activities (particularly Jamming sessions, open mic and poetry)
- The course is mainly activity-based that will offer a set of activities for the student that enables them to connect with fellow human beings, nature, society, and the world at large.
- The course will engage students for interactive sessions, open mic, reading group, storytelling sessions, and semester-long activities conducted by faculty mentors.
- Students should present the progress of the activities as per the schedule in the prescribed practical session in the field.
- There should be positive progress in the vertical order for the benefit of society in general through activities.

Plan of Action:

- Each student should do activities according to the scheme and syllabus.
- At the end of semester student performance has to be evaluated by the faculty mentor for the assigned activity progress and its completion.
- At last consolidated report of all activities from 1st to 5th, compiled report should be submitted as per the instructions and scheme.
- Practice Session Description:
 - Lecture session in field to start activities
 - Students Presentation on Ideas
 - Commencement of activity and its progress
 - Execution of Activity
 - Case study-based Assessment, Individual performance
 - Sector/ Team wise study and its consolidation
 - Video based seminar for 10 minutes by each student at the end of semester with Report.

Sl No	Topic	Groupsize	Location	Activity execution	Reporting	Evaluation of the Topic
1.	Plantation and adoption of a tree	May be individual or team (3-5)	Farmers land/ parks / Villages / roadside/ community area / College campus	Site selection / Proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus
2.	Heritage walk and crafts corner	May be individual or team (3-5)	Temples / monumental places / Villages/ City Areas / Grama panchayat/ public associations /Government Schemes officers/ campus	Site selection /Proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus
3.	Organic farming and waste management	May be individual or team (3-5)	Farmers land / parks /Villages visits / roadside/ communityarea / College campus	Group selection / proper consultation / Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus
4.	Water conservation : Conservation techniques	May be individual or team (3-5)	Villages/ City Areas /Grama panchayat/ public associations/ Government Schemes officers / campus	site selection / proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus
5.	Food walk: Practices in society	May be individual or team (3-5)	Villages/ City Areas /Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection / proper consultation / Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus

BASIC APPLIED MATHEMATICS-I

Course Code	22DMAT31	CIE Marks	50
L:T:P:S	0:0:0:0	SEE Marks	--
Hrs. / Week	2	Total Marks	50
Credits	00	Exam Hours	--

Course outcomes:

At the end of the course, the student will be able to:

22DMAT31.1	Know the principles of engineering mathematics through calculus
22DMAT31.2	Determine the power series expansion of a function
22DMAT31.3	Find the definite integrals with standard limits and also develop the ability to solve different types of differential equations
22DMAT31.4	Apply ideas from linear algebra in solving systems of linear equations and determine the Eigen values and Eigen vectors of a matrix

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
										0		
22DMAT31.1	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT31.2	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT31.3	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT31.4	3	3	-	-	-	-	-	-	-	-	-	-

MODULE-1	DIFFERENTIAL CALCULUS	22DMAT31.1 22DMAT31.2	8 Hours
-----------------	------------------------------	--	----------------

Polar Curves-Problems on angle between the radius vector and tangent, Angle between two curves-Problems, Pedal equation for polar curves-Problems. Maclaurin's theorem for function of one variable (statement only)-Problems.

Text Book Text Book 1: 4.4, 4.7, 4.8, Text Book 2: 15.4

MODULE-2	PARTIAL DIFFERENTIATION	22DMAT31.1	8 Hours
-----------------	--------------------------------	-------------------	----------------

Definition and Simple problems, Euler's theorem for Homogeneous function (NO Derivation and NO extended theorem)-Problems, Jacobians of order two - definition and problems.

Text Book Text Book 1: 5.4, 5.7,

MODULE-3	INTEGRAL CALCULUS AND DIFFERENTIAL EQUATIONS	22DMAT31.3	8 Hours
-----------------	---	-------------------	----------------

Problems on evaluation of $\sin n x$ and $\cos n x$ integrals with standard limits (0 to $\pi/2$). Solution of first order and first-degree differential equations-Variable separable, Linear and Exact differential equations.

Text Book Text Book 1: 6.2, 11.6, 11.9, 11.11, Text Book 2: 1.3, 1.4, 1.5

MODULE-4	LINEAR ALGEBRA-1	22DMAT31.4	8 Hours
-----------------	-------------------------	-------------------	----------------

Problems on rank of a matrix by elementary transformations, Solution of system of linear equations by Gauss elimination method-Problems.

Text Book Text Book 1: 2.7, 28.6, Text Book 2: 7.3, 7.4

MODULE-5	LINEAR ALGEBRA-2	22DMAT31.4	8 Hours
-----------------	-------------------------	-------------------	----------------

Linear transformation, Eigen values and Eigen Vectors of square matrix-Problems.

Text Book Text Book 1: 2.11, 2.13, Text Book 2: 7.9, 8.1.

CIE Assessment Pattern (50 X 2=100 Marks – Theory)

RBT Levels		Marks Distribution

Activity-Based Learning (Suggested Activities in Class)/Practical Based Learning:

- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare Algorithms/Flowcharts/Programming Codes
 - Organizing Group wise discussions on related topics
 - Seminars

SEMESTER IV

DISCRETE MATHEMATICS AND GRAPH THEORY

Course Code	22MAC41	CIE Marks	50
L:T:P:S	3:0:0:0	SEE Marks	50
Hrs. / Week	3	Total Marks	100
Credits	03	Exam Hours	03

Course outcomes:

At the end of the course, the student will be able to:

22MAC41.1	Explain the counting techniques and combinatorics by using the context of discrete probability.
22MAC41.2	Illustrate the principle of Inclusion and Exclusion
22MAC41.3	Apply Pigeon hole principle to solve real life problems.
22MAC41.4	Solve the engineering problems involving relations and functions.
22MAC41.5	Analyze the computer science problems by using graph theory techniques.
22MAC41.6	Justify the arguments with propositional and predicate logic and from truth tables.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22MAC41.1	3	3	-	-	-	-	-	-	-	-	-	-
22MAC41.2	3	3	-	-	-	-	-	-	-	-	-	-
22MAC41.3	3	3	-	-	-	-	-	-	-	-	-	-
22MAC41.4	3	3	-	-	-	-	-	-	-	-	-	-
22MAC41.5	3	3	-	-	-	-	-	-	-	-	-	-
22MAC41.6	3	3	-	-	-	-	-	-	-	-	-	-

MODULE-1 MATHEMATICAL LOGIC 22MAC41.1 8 Hours

Basic Connectives and Truth Tables, Tautology and Contradiction, Logic Equivalence, The Laws of Logic, Converse, Inverse and Contra positive, Logical Implication, Rules of Inference.

Case Study Case studies on roles of logic in specification of computation.

Text Book Text Book 1: 2.1, 2.2, 2.3.

MODULE-2 PRINCIPLES OF COUNTING 22MAC41.2 8 Hours

Catalan Numbers, Ramsey Numbers, Stirling Numbers and Bell Numbers, The principle of Inclusion and Exclusion, Generalizations of the principle, Derangements, Rook-Polynomials, Arrangements with Forbidden Positions.

Text Book Text Book 1: 1.5, 8.1, 8.2, 8.3, 8.4, 8.5.

MODULE-3 RELATIONS AND FUNCTIONS 22MAC41.3 8 Hours

Cartesian Products and Relations, One-to-One and onto functions. The Pigeon hole Principle, Function Composition and Inverse Functions. Properties of Relations, Equivalence Relations and Partitions.

Text Book Text Book 1: 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 7.4.

MODULE-4 GRAPH THEORY 22MAC41.4 8 Hours

Graphs-Definitions and examples, Sub graphs, Walks, Paths, Circuits, Connectedness, Components, graph isomorphism, Euler graphs, Hamiltonian paths and cycles.

Case Study Case studies on Network Analysis.

Text Book Text Book 1: 11.1, 11.2, 11.3, 11.5. Text Book 2: 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8, 2.9.

MODULE-5 TREES, CONNECTIVITY AND PLANARITY 22MAC41.5 22MAC41.6 8 Hours

Trees, Properties of trees, Rooted and binary trees. Spanning trees, cut sets, Properties of cut set, all cut sets, Fundamental circuits Network flows: Kruskal's algorithm, Planar graphs, Dual of planar graphs, Different representation of a planar graph.

Case Study Case studies on Social Network Analysis.

Text Book Text Book 1: 11.4, 12.1, 12.2, 12.3, 13.2, Text Book 2: 3.1, 3.5, 3.7, 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 5.2, 5.6, 5.7.

DATA BASE MANAGEMENT SYSTEM															
Course Code	22AIM42					CIE Marks	50								
L:T:P:S	3:0:0:0					SEE Marks	50								
Hrs/Week	3					Total Marks	100								
Credits	03					Exam Hours	03								
Course outcomes: At the end of the course, the student will be able to:															
22AIM42.1	Understand the concepts of Data Base Management Systems														
22AIM42.2	Design ER Diagram for the various real-world data base.														
22AIM42.3	Analyze the principles of DDL (Data Definition Language), DML (Data Manipulation Language), DCL (Data Control Language), and TCL (Transaction Control Language) for the provided scenario.														
22AIM42.4	Examine the notion of functional dependencies and employ normalization techniques to enhance the precision and structure of databases														
22AIM42.5	Investigate the functionalities of joins, views, triggers, and assertions across different database systems.														
22AIM42.6	Characterise different high-level databases and the selection of the right database.														
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	
22AIM42.1	2	-	-	-	-	-	-	-	-	-	-	-	3	2	
22AIM42.2	3	3	2	-	-	-	-	-	-	-	-	-	3	2	
22AIM42.3	2	2	-	-	-	-	-	-	-	-	-	-	3	2	
22AIM42.4	3	3	3	-	3	-	-	-	-	-	-	3	3	2	
22AIM42.5	2	2	2	2	3	-	-	-	-	-	-	3	3	2	
22AIM42.6	3	3	3	3	3	-	-	-	-	-	-	3	3	2	
MODULE-1	INTRODUCTION TO DATABASES										22AIM42.1, 22AIM42.2		8 Hours		
Definition of database, DBMS; Characteristics of Database approach; Advantages of using DBMS approach; when not to use a DBMS Database Concept and Architecture: Datamodels, schemas and instances; Data Abstraction; Three-schema architecture and data independence; Components of a DBMS- Database Designer- Database Administrator- Database Users. Introduction to Entity-Relationship Model: Entity Types, Attributes and Keys; Relationship types, Roles and Structural Constraints; Weak Entity Types; ER Diagrams, Naming Conventions and Design Issues; Reduction of an E-R schemato relational Tables															
Case Study	Construct an E-R diagram for hospital management database and company database.														
Text Book	Text Book 1 : Chapter 1,2,6.1-6.8														
MODULE-2	LOGICAL DESIGN AND RELATIONAL MODEL										22AIM42.1, 22AIM42.3		8 Hours		
Domains, Attributes, Tuples, and Relations; Relational Model Constraints; Relational Database Schemas; SQL1: Overview of SQL language; SQL Data Definition and Data Types; Schema change statements in SQL; Enforcing basic constraints in SQL; Basic structure of SQL queries Joins; Logical connectives-AND, OR and NOT; Addition basic operations; Setoperations; Aggregate function															
Case Study	Develop a database for the hospital to maintain the records of various departments, rooms, and doctors in the hospital. It also maintains records of the regular patients, patients admitted in the hospital, the check up of patients done by the doctors, the patients that have been operated, and patients discharged from the hospital.														
Text Book	Text Book1: 3.1-3.9,4.1-4.5														
MODULE-3	ADVANCED SQL										22AIM42.1, 22AIM42.5		8 Hours		
Introduction to Nested Queries; Correlated Nested Queries; Introduction to Views: creation, implementation, update of views; Introduction to Assertion and Trigger															
Case Study/Applicati on	Develop a relational database is to be designed for a medium sized Company dealing with industrial applications of computers. Each employee works in some department. An employee may possess a number of skills, Every manager (including the MD) is an employee. A department may participate in none/one/many projects. At least one department participates in a project. An employee may be engaged in none/one/many projects, Project teams consist of at least one member.														
Text Book	Text Book1:4.2,5.3,5.4														
MODULE-4	DATABASE DESIGN AND INDEX STRUCTURES										22AIM42.5		8 Hours		

Indexes on Sequential Files: dense, sparse index; multi-level indexing; Hash Based Indexing: Static Hashing and dynamic hashing. Database Refinement: Informal Design Guidelines for Relation Schemas; Functional Dependencies; Normalization on Relational Data Base: 1NF, 2NF, 3NF, BCNF; Transaction Management: The ACID Properties.

Text Book | Text Book 2: 15.1-15.7 ,18.1-18.5

MODULE-5	INTRODUCTION TO HIGH_LEVEL DATABASES	22AIM42.6	8 Hours
-----------------	---	------------------	----------------

What is No SQL, Need of NOSQL, Features OF NO SQL, CAP Theorem, ACID v/s BASE, Advantages&Disadvantages ofNO SQL, Types of NOSQL: Key-Value database- Document-based database- Column-baseddatabase-Graphbased database? **Introduction to Cassandra:** Architecture, Gossip protocol, Snitches, Virtual Nodes, write consistency level and write process, read consistency level and read data operation, indexing, Tombstones

Case Study | MongoDB, DynamoDB

Text Book | Text Book 3: 1.1,1.2 , 2.1-2.4,8.1,8.2,9.1,9.2,10.1,10.2 Textbook 4: Chapter 1,2

22AIL42.4	3	3	3	3	3	-	-	-	2	2	-	-	3	2

Exp. No. /Pgm.No.	List of Experiments/Programs	Hours	COs
Pre-requisite Experiments/ Programs/ Demo			
	Draw E-R diagram and convert entities and relationships to relation table for a given scenario. Two assignments shall be carried out i.e. consider two different scenarios (eg. bank, college)	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4

PART-A

1	Write relational algebra queries a. View in all databases, Creating a Database, b. Viewing all Tables in a Database, c. Creating Tables (With and Without Constraints), d. Inserting/Updating/Deleting tables records in a Table, e. Saving (Commit) and Undoing (rollback)	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4
2	Write relational algebra queries a. Altering a Table, b. Dropping/Truncating/Renaming Tables, c. Backup/Restoring a Database.	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4
3	Consider the following database for student enrolment for course: STUDENT (snum: integer, sname: string, major: string, level: string, age: integer) CLASS (name: string, meetsat: time, room: string, fid: integer) ENROLLED (snum: integer, cname: string) FACULTY (fid: integer, fname: string, deptid: integer) The meaning of these relations is straightforward; for example, Enrolled has one record per student-class pair such that the student is enrolled in the class. Level is a two character code with 4 different values (example: Junior: JR etc) Write the following queries in SQL. No duplicates should be printed in any of the answers. i. Find the names of all Juniors (level=JR) who are enrolled in a class taught by Prof. Shashikala	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4

	<p>ii. Find the names of all classes that either meet in room R128 or have five or more Students enrolled.</p> <p>iii. Find the names of all students who are enrolled in two classes that meet at the same time.</p> <p>iv. Find the names of faculty members who teach in every room in which some class is taught.</p> <p>v. Find the names of faculty members for whom the combined enrolment of the courses that they teach is less than five.</p>		
4	<p>Consider the following database that keeps track of airline flight information:</p> <p>FLIGHTS (flno: integer, from: string, to: string, distance: integer, departs: time, arrives: time, price: integer)</p> <p>AIRCRAFT (aid: integer, aname: string, cruising range: integer)</p> <p>CERTIFIED (eid:integer,aid:integer)</p> <p>EMPLOYEE (eid:integer,ename:string, salary:integer)</p> <p>Note that the Employees relation describes pilots and other kinds of employees as well; Every pilot is certified for some aircraft, and only pilots are certified to fly. Write each of the following queries in SQL.</p> <p>i. Find the names of aircraft such that all pilots certified to operate them have salaries more than Rs.80,000.</p> <p>ii. For each pilot who is certified for more than three aircrafts, find the eid and the maximum cruising range of the aircraft for which she or he is certified.</p> <p>iii. Find the names of pilots whose salary is less than the price of the cheapest route from Bengaluru to Frankfurt.</p> <p>iv. For all aircraft with cruising range over 1000 Kms, find the name of the aircraft and the average salary of all pilots certified for this aircraft.</p> <p>v. Find the names of pilots certified for some Boeing aircraft.</p>	2	<p>22AIL42.1</p> <p>22AIL42.2</p> <p>22AIL42.3</p> <p>22AIL42.4</p>
5	<p>Consider the following relations for an Order Processing database application in a company.</p> <p>CUSTOMER (CUST #: int, cname: String, city: String)</p> <p>ORDER (order #: int, odate: date, cust #: int, ord-Amt: int)</p> <p>ITEM (item#:int, unit-price: int)</p> <p>ORDER-ITEM (order #: int, item #: int, qty: int)</p> <p>WAREHOUSE (warehouse#:int,city:String) SHIPMENT (order#:int,warehouse #: int,ship-date:date)</p> <p>i. Create the above tables by properly specifying the primary keys and the foreign keys and the foreign keys.</p> <p>ii. Enter at least five tuples for each relation.</p> <p>iii. Produce a listing: CUSTNAME, #of orders,AVG_ORDER_AMT, where the middle column is the total numbers of orders by the customer and the last column is the average order amount for that customer.</p> <p>iv. List the order # for orders that were shipped from all warehouses that the company has in a specific city.</p> <p>v. Demonstrate how you delete item# 10 from the ITEM table and make that field null in the ORDER_ITEM table.</p>	2	<p>22AIL42.1</p> <p>22AIL42.2</p> <p>22AIL42.3</p> <p>22AIL42.4</p>
PART-B			
	<p>The following tables are maintained by a book dealer:</p> <p>AUTHOR (author_id: int, name: string, city: string, country:string)</p>		

6	<p>PUBLISHER (publisher_id:int, name: string, city: string, country: string) CATALOG (book_id:int, title:string, author_id:int, publisher_id:int, category_id:int, year:int, price:int) CATEGORY (category_id:int,description:string) ORDER-DETAILS (order_no:int,book_id:int,quantity:int)</p> <p>(i) Create the above tables by properly specifying the primary keys and the foreign keys. (ii) Enter at least five tuples for each relation. (iii) Give the details of the authors who have 2 or more books in the catalog and the price of the books is greater than the average price of the books in the catalog and the year of publication is after 2000. (iv) Find the author of the book which has maximum sales. (v) Demonstrate how you increase the price of books published by a specific publisher by 10%.</p>	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4
7	<p>Consider the following database of student enrollment in courses and books adopted for each course. STUDENT(regno:String,name:String,major:String,bdate:date) COURSE(course #:int, cname:String,dept:String) ENROLL (regno: String, course #: int, sem: int, marks: int) BOOK_ADOPTION (course #: int, sem: int, book-ISBN: int) TEXT(book-ISBN:int, book-title:String, publisher:String,author:String)</p> <p>i. Create the above tables by properly specifying the primary keys and the foreign keys. ii. Enter at least five tuples for each relation. iii. Demonstrate how you add a new textbook to the database and make this book be adopted by some department. iv. Produce a list of textbooks (include Course #, Book-ISBN, Book-title) in the alphabetical order for courses offered by the 'AIML' department that use more than two books. v. List any department that has all its adopted books published by a specific publisher.</p>	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4
8	<p>Consider the schema for Movie Database: ACTOR(Act_id, Act_Name, Act_Gender) DIRECTOR(Dir_id,Dir_Name,Dir_Phone) MOVIES(Mov_id, Mov_Title, Mov_Year, Mov_Lang, Dir_id) MOVIE_CAST(Act_id,Mov_id, Role) RATING(Mov_id,Rev_Stars)</p> <p>Write SQL queries to</p> <p>i. List the titles of all movies directed by 'Hitchcock'. ii. Find the movie names where one or more actors acted in two or more movies. iii. List all actors who acted in a movie before 2000 and in a movie after 2015 (use JOIN operation). iv. Find the title of movies and number of stars for each movie that has at least one rating and find the highest number of stars that movie received. Sort the result by movie title. v. Update rating of all movies directed by 'Steven Spielberg' to 5</p>	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4

9	Design and develop MongoDB queries to implement the CRUD operations	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4
10	Implement aggregation and indexing using MongoDB	2	22AIL42.1 22AIL42.2 22AIL42.3 22AIL42.4

DESIGN AND ANALYSIS OF ALGORITHMS														
Course Code	22AIM43					CIE Marks					50			
L:T:P:S	3:0:0:0					SEE Marks					50			
Hrs / Week	3					Total Marks					100			
Credits	03					Exam Hours					03			
Course outcomes:														
At the end of the course, the student will be able to:														
22AIM43.1	Design algorithmic method to solve simple to complex problems using various approaches													
22AIM43.2	Employ both brute force and divide-and-conquer design strategies to evaluate an algorithm's effectiveness in devising a solution													
22AIM43.3	Identify from a variety of design techniques to address searching and sorting challenges													
22AIM43.4	Analyze both greedy and dynamic programming strategies for solving intricate problems													
22AIM43.5	Apply back-tracking and branch&bound technique to assess an algorithm and formulate solution													
22AIM43.6	Examine the NP, and NP-complete complexity classes to scrutinize the constraints and boundaries of an algorithm's performance													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22AIM43.6	3	3	3	3	3	-	-	-	-	-	-	-	3	3
MODULE-1 INTRODUCTION														
MODULE-1	INTRODUCTION					22AIM43.1					8 Hours			
Introduction to Algorithms, Role of algorithms in computing, Time and Space Complexity of Algorithms, Asymptotic notations, worst-case, Average-case and Best-case analysis, Analysis Framework- Empirical analysis- Mathematical analysis for Recursive and Non-recursive algorithms.														
Case Study	Illustrate real-world applications of algorithms and growth functions.													
Text Book	Text Book 1:1.1,1.2,1.3													
MODULE-2 DIVIDE AND CONQUER														
MODULE-2	DIVIDE AND CONQUER					22AIM43.2					8 Hours			
Divide and Conquer Methodology: Binary search, Merge sort, Quick sort, Finding the maximum and minimum, Strassen's matrix, advantages and disadvantages of divide and conquer.														
Case Study	Compare and contrast the time complexity and suitability of the bubble sort, merge sort, and quicksort algorithms. Provide scenarios where one might be preferred over the others.													
Text Book	Text Book 1: 2.1,2.2													
MODULE-3 GREEDY METHOD AND DYNAMIC PROGRAMMING														
MODULE-3	GREEDY METHOD AND DYNAMIC PROGRAMMING					22AIM43.3					8 Hours			
Greedy method: Introduction, Job scheduling problem, Minimum Spanning tree algorithms – Kruskals & Prims. Optimal Tree Problem: Huffman Trees. DYNAMIC PROGRAMMING: Introduction, Knapsack problems, Travelling Salesman problem. Transitive closure - Warshall's and Floyds algorithm.														

Case Study	shortest path algorithms in GPS navigation.		
Text Book	Text Book 1: 9.1,9.2,9.3,9.4		
MODULE-4	DECREASE & CONQUER, TRANSFORM & CONQUER	22AIM43.4	8 Hours

Decrease & conquer: Introduction – Decrease by constant, decrease by constant factor-Fake Coin Problem-Russian Peasant Multiplication, variable size decrease.

Transform & conquer: Introduction, Balanced Search trees – AVL trees & 2-3 trees, Red Black Trees

Text Book | Text Book 1: 5.1,5.2,5.3,5.4,5.5,5.6

MODULE-5	BACKTRACKING, BRANCH AND BOUND	22AIM43.5,22AIM43.6	8 Hours
-----------------	---------------------------------------	----------------------------	----------------

Backtracking: Introduction, N Queens problem, subset sum problem, **Branch and Bound:** Introduction, Travelling Salesman problem, Knapsack problem, Assignment problem, NP-Hard and NP-Complete problems: Basic concepts, non- deterministic algorithms.

Text Book | Text Book 1: 12.1,12.2,12.3

MODULE-1	BASIC CONCEPTS AND PYTHON PACKAGES								22AIM44.1			8Hours			
Basic Concepts: Predictive Modelling, Data preparation, Importance of Data preparation, Data Cleaning, Feature selection, Data Transform, Dimensionality reduction, K-fold cross validation, Data Leakage and avoidance measure. Python Packages: Numpy, Matplotlib, pandas, scipy, scikit, Dataframe, Loading Machine Learning data.															
Textbook	Textbook1: Chapter:1,2,3, 4														
MODULE-2	DESCRIPTIVE STATISTICS AND DATA PREPARATION								22AIM44.1, 22AIM44.2, 22AIM44.4			8 Hours			
Descriptive Statistics: Reasons to study Statistics, Sampling, Data Analysis Process, Mean, Median, StandardDeviation, Skewness, Kurtosis, Graphical Representation-Box Plots, Pivot Table, Heat Map Correlation, Statistics-ANOVA. DataPreparation: Need for Data Pre-processing, DataTransforms, and Rescale Data Standardize Data, Normalize Data, Binarize Data, Univariate and Bivariate Data, Recursive Feature Elimination, Principal Component Analysis.															
Textbook	Textbook 2: Chapter:1, 2,4, 5, 8, 10,11, 12,13,14,15														
MODULE-3	DATA CLEANING AND FEATURE SELECTION								22AIM44.3, 22AIM44.4			8 Hours			
Data Cleaning: Basic data cleaning, Outlier Identification and Removal, how to Mark and Remove Missing Data, Statistical Imputation, KNN Imputation, Iterative Imputation. Feature Selection: Statistics for feature selection, Methods for categorical input, Methods for Numerical input, Select Features for Numerical Output, RFE for Feature Selection, Significance of feature selection.															
Textbook	Text Book1 : Chapter:5, 6,7, 8,9, 10,11, 12,13, 14,15, 16.														
MODULE-4	DATA TRANSFORM AND DIMENSIONALITY REDUCTION								22AIM44.4, 22AIM42.5			8 Hours			
Data Transforms: Scaling data source, min-max scalar and standard scaler, Scale data with outliers, encode categorical data, Make Distributions More Gaussian, Approach for Numerical Data Distributions, Deriving new input variables. Dimensionality reduction: Techniques for Dimensionality Reduction, Linear Discriminant Analysis, PCA Dimensionality Reduction, SVD Dimensionality Reduction															
Textbook	Text Book1: Chapter:17,18, 19,20,21,23,27, 28,29, 30.														

MODULE-5	OTHER TRANSFORMS	22AIM44.5, 22AIM44.6	8 Hours
-----------------	-------------------------	---------------------------------	----------------

Transform numerical to categorical, Transform Numerical and Categorical Data, Transform the Target in Regression, Save and load the transformation, case studies for Binary classification, Multiclassification and Regression

Ex. No		Hours	COs
Prerequisite Experiments/Programs/ Demo			
	Recall the following python Libraries commands for data science. a. Numpy b. Pandas c. Matplot d. Scipy	2	NA

Part A

1.	Reading different types of data sets (.txt, .csv) from Web and disk and writing in file in specific disk location. a. Reading Excel data sheet using Python Pandas. b. Reading XML dataset using Python Pandas. c. Reading JSON data using Python Pandas	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
2.	a. Find the data distributions using box and scatter plot. b. Find the outliers using plot. c. Plot the histogram, bar chart and pie chart on sample data. d. Plot the HeatMap	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
3.	Implement K-fold cross validation techniques	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
4	Implement the program to avoid Data leakage with Naïve Data preparation	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
5	Perform the following methods in order to remove outliers a. Standard Deviation Method b. Interquartile Range Method c. Automatic outlier Detection	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
6	Apply the following on IRIS dataset a. Find the correlation matrix. b. Plot the correlation plot on dataset and visualize giving an overview of relationships among data on iris data. c. Analysis of covariance: variance (ANOVA)	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4

Part B			
7.	Implement the following for breast cancer (Hint: from sklearn. datasets importload_breast_cancer) a. Load data set b. Convert into Dataframe c. Apply Scaler method d. Fit the Scaler Data into PCA e. Plot the visualization diagram for PCA	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
8	Apply the following imputation methods for horse-colic dataset. a. Statistical Imputation b. KNN Imputation c. Iterative Imputation	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
9	Implement the following Encoding methods. a. Ordinal Encoding b. One Hot Encoding c. Dummy Variable Encoding [Data Set: breast-cancer.csv]	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
10	Implement the following Transform methods a. Uniform Discretization Transform	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
11	k-Means Discretization Transform [Data Set: sonar.csv]	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4
12	Implement Binary classification, Multi-classification and regression.	2	22AIL44.1 22AIL44.2 22AIL44.3 22AIL44.4

Credits	3								ExamHours	03					
Course outcomes: At the end of the course, the student will be able to:															
22AIM451.1	Understand the syntax, control structures and looping functions.														
22AIM451.2	Apply the concept of object-oriented programming concepts on Ruby														
22AIM451.3	Illustrate the MVC architecture of Ruby on Rails.														
22AIM451.4	Analyze the coding standards and derive the test cases.														
22AIM451.5	Develop application using meta-programming concepts.														
22AIM451.6	Integrate Ruby with other programming languages to foster a cross-platform development.														
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:															
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	
22AIM451.1	2	-	-	-	-	-	-	-	-	-	-	-	3	-	
22AIM451.2	3	-	-	-	-	-	-	-	-	-	-	-	3	-	
22AIM451.3	3	3	-	-	-	-	-	-	-	-	-	-	3	-	
22AIM451.4	3	3	-	-	--	-	-	-	-	-	-	-	3	-	
22AIM451.5	3	3	3	-	-	-	-	-	-	-	-	-	3	-	
22AIM451.6	3	3	3	3	-	-	-	-	-	-	-	-	3	-	
MODULE-1 INTRODUCTION															
										22AIM451.1	8 Hours				
Installation and Setup, Ruby Syntax, Variables, Data Types, and Operators, Control Structures and Loops, Functions and Methods.															
Laboratory Component:															
<ol style="list-style-type: none"> Variables and Arithmetic: Learn variable assignment and basic math operations. Data Types: Explore integers, floats, strings, and booleans. User Interaction: Accept user input and display it. Control Flow: Master conditionals and loops for decision-making. Data Structures: Work with arrays and strings. Functions (Methods): Define, call, and return values from functions. Program Examples: Develop practical programs like a calculator and word game 															
Text Book			Text Book1:3,4, 5,6												
MODULE-2 OBJECT-ORIENTED PROGRAMMING															
										22AIM451.2	8 Hours				
Classes and Objects, Inheritance and Polymorphism, Encapsulation and Abstraction, Modules and Mixins.															
Laboratory Component:															
<ol style="list-style-type: none"> Write a program using Classes and Objects in Ruby. Write a program for inheritance using Ruby. Implement OOP concept on Net Banking system 															
Text Book			Text Book1:7,8						Text Book2:4						
MODULE-3 WEB DEVELOPMENT WITH RUBY ON RAILS															
										22AIM451.3	8 Hours				
Overview of Ruby on Rails, Setting and Configuration for Rails Application, MVC Architecture, Database Integration using Active Record, Views and Templates using ERB															
Laboratory Component:															
<ol style="list-style-type: none"> To create online stores with decent and sophisticated browsing and purchasing options. To create efficient stock marketing platforms. To create Social Networking sites. 															
Text Book			Text Book2:1,2												
MODULE-4 CODING STANDARDS AND TESTING															
										22AIM451.4	8 Hours				
Coding Style and Standards, Documentation using RDoc and YARD, Version Control using Git. Testing Frameworks -RSpec, Writing and Running Tests for Ruby Code, Code Debugging-Pry.															
Laboratory Component:															
<ol style="list-style-type: none"> Using Functional testing on Health care data. Write a program for an Online survey process for healthcare dataTest. Write a program in Ruby programming using coding standard and style. 															

Text Book	Text Book: 2			
MODULE-5	ADVANCED RUBY	22AIM451.5	8 Hours	
eta-programming, Concurrency using threads and fibers, Performance Optimization, Integrating Ruby with Other Languages, Working with APIs, Data Processing and Analysis using Ruby				
Laboratory Component:				
1. Visualize the data using Ruby,				
2. Develop a program for Data Science concepts in Ruby				
3. Develop a program for Performance optimization using Ruby.				
Text Book	Text Book: 2

C# AND .NET FRAMEWORK														
Course Code	22AIM452							CIE Marks	50					
L:T:P:S	2:0:1:0							SEEMarks	50					
Hrs/Week	4							TotalMarks	100					
Credits	03							ExamHours	03					
Course outcomes: At the end of the course, the student will be able to:														
22AIM452.1	Demonstrate a comprehensive understanding of various data structures and Data Manipulation in C#													
22AIM452.2	Apply delegates and events for .NET framework.													
22AIM452.3	Analyze software architecture in web services.													
22AIM452.4	Implement advanced file handling techniques, ensuring competency in file and data management within .NET applications													
22AIM452.5	Proficiency in design, develop, and deploy web applications using .NET													
22AIM452.6	Develop server-side applications and web services.													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM452.1	3	-	-	-	-	-	-	-	-	-	-	-	3	3
22AIM452.2	3	3	-	-	-	-	-	-	-	-	-	-	3	3
22AIM452.3	3	3	-	-	-	-	-	-	-	-	-	-	3	3
22AIM452.4	3	3	3	-	-	-	-	-	-	-	-	-	3	3
22AIM452.5	3	3	3	3	3	-	-	-	-	-	-	-	3	3
22AIM452.6	3	3	3	3	3	-	-	-	-	-	-	-	3	3
MODULE-1 .NET frame work overview 22AIM452.1 8 Hours														
.NET frame work architecture. Introduction to C# language: Primitive datatypes–Enumerations–Expressions–Statements–Control structures (if, for,while,do. While,for each).Object-oriented concepts in .NET– Common type system.														
Text Book			TextBook2 : unit1,2,3,4,5											
Laboratory Component:														
1. Write a program demonstrates the use of primitive data types, expressions, and control structures. 2. Write a program to illustrate object-oriented concepts in C#. 3. Write a program to demonstrate file I/O operations, expressions, , as well as the use of exceptions for error handling.														
MODULE-2 Collection Classes and Strings 22AIM452.2 8 Hours														
Arrays and collections- Dictionaries-Hash Set and Sorted Set-Queues-Linked Lists.–Working with strings–The String and CharTypes-Literal Strings and Chars-Formatting Data for Output- Standard Numeric Format Strings-Custom Numeric Format Strings-Dates and Times-Converting Strings to Other Types														
TextBook			Text Book1: unit 9,10											
Laboratory Component:														
1. Create a program that demonstrates the use of a dictionary to store and retrieve key-value pairs 2. Develop a program that takes user input as a sentence and performs various string operations, such as counting the number of words, reversing the sentence, or converting it to title case. 3. Write a program that allows users to perform date and time calculations, such as finding the difference between two dates, adding or subtracting days, and displaying the current date and time in different formats														
MODULE-3 XML and Networking 22AIM452.2, 22AIM452.3, 22AIM452.4 8 Hours														
Working with XML Creating XML Documents- XML Elements-XML Attributes-Searching for a Single Node-Search Axes- Where Clauses- XMLSerialization–Networking-Web Application with Client-Side Code- .NET Client and.NETServer-.NET Client and External Party Web Service-External Client and .NET Web Service-WCF- Creating a WCF Project-Hosting a WCF Service														
Text Book			TextBook 1: unit-12,13											
Laboratory Component:														
1. Create a program that generates an XML document containing information about books, including titles, authors, and publication years. Save this XML data to a file 2. Write a program to parse and display specific book details from the XML file. 3. Develop a program that consumes a public web service, such as a weather forecast service or a currency														

conversion service.

MODULE-4	Files and Streams	22AIM452.2,22AIM452.3,22AIM452.4	8 Hours
-----------------	--------------------------	---	----------------

Files and Streams -Inspecting Directories and Files-Examining Directories -Manipulating File Paths -Path and the Current Working Directory -Examining File Information-Creating Temporary Files -Deleting Files and directory -Writing Text Files-Finding and Modifying Permissions-Reading Files into Memory-Moving Around a Stream -Writing Data with Streams-Reading, Writing, and Locking Files

Text Book | Text Book 1: unit-11

Laboratory Component:

1. Write a program to retrieve data from the web service and display it in a user-friendly format.
2. Creating a program to create a file, modifying permissions.
3. Write a program to identify the path in Dot Net.

MODULE-5	Windows Forms	22AIM452.4,22AIM452.5, 22AIM452.6	8 Hours
-----------------	----------------------	--	----------------

Creating a Web Application-Data Binding -Windows forms – ASP.NET and Web applications -Code-Behind Files-Adding Controls-Server Controls-Data Binding-Examining the Code-Adding Controls and Events

Text Book | Text Book 1: unit-21,22

Laboratory Component:

1. Design a web form with server controls, employ data binding to display dynamic content using ASP.Net.
2. Write a code-behind logic to handle user interactions and events using ASP.Net.
3. Design a graphical user interface, implement data binding for data manipulation

CIE Assessment Pattern (50Marks– Theory and Lab)

 - Seminars

R PROGRAMMING														
Course Code	22AIM453					CIE Marks	50							
L:T:P:S	2:0:1:0					SEEMarks	50							
Hrs/Week	4					TotalMarks	100							
Credits	03					ExamHours	03							
Course outcomes: At the end of the course, the student will be able to:														
22AIM453.1	Understand the types, classes and functions of R Programming.													
22AIM453.2	Apply the knowledge of R Data Structures for real world example.													
22AIM453.3	Develop programming logic using R–Packages													
22AIM453.4	Analyze the Data manipulation in R programming.													
22AIM453.5	Illustrate the basics of Data Preparation with real world examples.													
22AIM453.6	Design Visualization using R tools for given data set.													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

22AIM453.6	3	3	-	3	3	-	-	-	-	-	-		3	3
MODULE-1	FUNDAMENTALS OF RPROGRAMMING					22AIM453.1					8 Hours			
Installation of R & R Studio, Features of R, Variables in R, Constants in R, Operators in R, Datatypes and RObjects, Accepting Inputfrom keyboard, ImportantBuilt-infunctions														
LaboratoryComponent:														
1. Download and install R-Programming environment and install basic packages using install. Packages, command in R.														
2. Learn all thebasics of R-Programming (Data types, Variables, Operators) etc.														
3. Writea programtofindlistof even numbersfrom1ton usingR-Loops														
Self-study / Case Study /Applications					Data Frames in R									
Text Book					Text Book1									
MODULE-2	UNDERSTANDING R DATASTRUCTURE					22AIM453.2					8 Hours			
Variables in R, Scalars, Vectors, Matrices, List, Data frames, Usingc, Cbind, Rbind, attach and detach functions in RFactors														
Laboratory Component:(minimum3experiments/programs)														
1. Implement different String Manipulation functions in R.														
2. Implement different data structures in R (Vectors, Lists, Data Frames)														
3. Implementation of matrix, array and factorsand perform in R														
Self-study / Case Study /Applications					R-Packages									
Text Book					Text Book1									
MODULE-3	IMPORTING DATA					22AIM453.3					8 Hours			
Reading Tabular Data files, Reading CSV files, Importing data from excel, Importing data from SAS, Accessing database, Savingin Rdata, Loading R dataobjects, Writing to files														
LaboratoryComponent:														
1. Write a program to read a csv file and analyze the data in the file in R.														
2. Implementation and use of data frames in R														
3. Create a dataset and do statistical analysis on the data using R.														
Self-study / Case Study /Applications					R-Factors									
Text Book					Text Book1									

MODULE-4	MANIPULATING DATA	22AIM453.4	8 Hours	
Selecting rows/observations, Selecting columns/fields, Merging data, Relabelling the column names, Converting variable types, Data sorting, Data aggregation				
Laboratory Component:				
<ol style="list-style-type: none"> 1. Create Sample (Dummy) Data in R and perform data manipulation with R 2. Study and implementation of various control structures in R 3. Data Manipulation with dplyr package 				
Self-study / Case Study / Applications		DPLYR Package		
Text Book	Text Book2			
MODULE-5	R DATA VIZUALIZATION	22AIM453.5	8 Hours	
R Functions, Data Visualization, Boxplot, Histogram, Pare to charts, Piegraph, Linechart, Scatter plot, Developing graphs, Simulating a Linear Model				
Laboratory Component:				
<ol style="list-style-type: none"> 4. Create pie chart and bar chart using R. 5. Use R Graphics to visualize results of various statistical operations on data. 6. Study and implementation of Data Visualization with gg plot2 				
Self-study/Case Study /Applications		R-Graphics

ADVANCED PYTHON PROGRAMMING

Course Code	22AIM454	CIE Marks	50
L:T:P:S	2:0:1:0	SEEMarks	50
Hrs/Week	4	TotalMarks	100
Credits	03	ExamHours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM454.1	Understand OOP concepts in Python including Inheritance and Polymorphism.
22AIM454.2	Apply the knowledge on files and perform operations on it using Python.
22AIM454.3	Develop regular expression and concept of threads for developing efficient program.
22AIM454.4	Analyze exception handling in Python applications for error handling.
22AIM454.5	Implement the objected Oriented Concepts to solve given problem
22AIM454.6	Design databases, designing GUI in Python and implement Networking in Python

Mapping of Course Outcome to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM454.1	2	-	-	-	-	-	-	-	-	-	-	-	3	2
22AIM454.2	3	-	-	-	-	-	-	-	-	-	-	-	3	2
22AIM454.3	3	3	3	-	-	-	-	-	-	-	-	-	3	2
22AIM454.4	3	3	-	-	-	-	-	-	-	-	-	-	3	2
22AIM454.5	3	3	3	-	-	-	-	-	-	-	-	-	3	2
22AIM454.6	3	3	3	3	3	-	-	-	-	-	-	-	3	2

MODULE-1	Working with files, Regular Expressions	22AIM454.1	8Hours
-----------------	--	-------------------	---------------

Working with files: Files, opening and closing a file, working with text files containing strings, knowing whether a file exists or not, working with binary files, the “with” statement, the seek() and tell() methods, random accessing of binary files, zipping and unzipping files, working with directories, running other programs from python program.

Regular expressions: What is a regular expression?, sequence characters in regular expressions, quantifiers in regular expressions, special characters in regular expressions, using regular expression on files, retrieving information from an html file.

Laboratory Component:

1. Write a Python program to implement various file operations.
2. Write a Python program to demonstrate use of regular expression for suitable Application.
3. Write a program to retrieve the information from an html file.

Self-study / Case Study /Applications	Use Python's built-in open() function to read and write to text files. Implement context managers (with statements) to ensure proper file handling and automatic resource cleanup.
---------------------------------------	--

Text Book	Text Book1:8
-----------	--------------

Module 2	Threads and Data	22AIM454.2	8 Hours
-----------------	-------------------------	-------------------	----------------

Threads in python: Difference between process and thread, types of threads, benefits of threads, creating threads, single tasking and multitasking, thread synchronization, deadlock in threads, daemon threads.

Date and time in python: Date and time now, combining date and time, formatting dates and times, finding duration nusing “timedelta”, comparing two dates, sorting dates, stopping execution temporarily, knowing the time taken by a program, calendar module.

Laboratory Component:

1. Write a Program to demonstrate concept of threading and multitasking in Python.
2. Write a Python Program to create application which uses date and time.
3. Write a program to stopping execution temporarily using python.

Text Book	Text Book3:10
-----------	---------------

MODULE-3	Exceptions and Database in python	22AIM454.3 22AIM454.4	8 Hours
<p>Database in python: Using SQL with python, retrieving rows from a table, inserting rows into a table, deleting rows from a table, updating rows in a table, creating database tables through python, Exception handling in databases.</p> <p>Exceptions in python: Errors in a python program, compile&run-time errors, logical error, exceptions-exception handling, types of exceptions, the except block, the assert statement, user-defined exceptions, logging the exceptions</p>			
<p>Laboratory Component:</p> <ol style="list-style-type: none"> 1. Write a Python Program to work with databases in Python to perform operations such as Connecting to database 2. Creating and dropping tables Inserting and updating into tables. 3. Write a Python Program to demonstrate different types of exception handling. 			
Self-study/Case Study /Applications	Use libraries like sqlite3 For SQLite or mysql-connector For MySQL to establish Connections between the Python application and the database.		
Text Book	Text Book 1:15		
MODULE-4	Networking: Protocols, server-client architecture, tcp/ip and udp communication Graphical user interface: Creating a GUI in python, Widget classes, Working with Fonts and Colors, working with Frames, Layout manager, Event handling OOPs in python: Features of Object-Oriented Programming system(oops) – classes and objects, encapsulation, abstraction inheritance, polymorphism, constructors and destructors.	22AIM454.4 22AIM454.6	8 Hours
<p>Laboratory Component:</p> <ol style="list-style-type: none"> 1. Write a GUI Program in Python to design application that demonstrates Different fonts and colors different Layout Managers and Event Handling 2. Write a Python program to create server-client and exchange basic information. 3. Write a python program for constructors and destructors concepts. 			
Self-study / CaseStudy / Applications	Handle socket-related exceptions and errors effectively to prevent crashes and improve the application's robustness.		
Text Book	TextBook 1:13 Textbook 3:13		
MODULE-5	Object Oriented Concepts in Python	22AIM454.5	8 Hours
<p>Classes and objects: Creating a class, the self-variable, types of variables, namespaces, types of methods, instance methods, class methods, static methods, passing members of one class to another class, inner classes</p> <p>Inheritance and polymorphism: Inheritance in python, types of inheritance- single inheritance, multilevel inheritance, hierarchical inheritance, multiple inheritance, constructors in inheritance, overriding super class constructors and methods, the super () method, method resolution order (mro), polymorphism, duck typing, operator overloading, method overloading, method overriding, Abstract classes and interfaces: Abstract class, Abstract method, Interfaces in python, abstract classes vs. Interfaces</p>			
<p>Laboratory Component:</p> <ol style="list-style-type: none"> 1. Write a program to Python program to implement concepts of OOP such as <ol style="list-style-type: none"> a. Types of Methods b. Inheritance c. Polymorphism 2. Write a program to Python program to implement concepts of OOP such as <ol style="list-style-type: none"> a. Abstract methods and classes b. Interfaces 3. Write a program for inner class using Python. 			

Self-study/CaseStudy / Applications	Design the system using OOP principles to create modular, maintainable, and extensible code. Create classes for data collection, strategy implementation, risk management, trade execution, and portfolio management.
-------------------------------------	---

DATABASE PROGRAMMING USING CASSANDRA

Course Code	22AIM461	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	50
Hrs/Week	2	Total Marks	100
Credits	01	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM461.1	Illustrate the concepts of Cassandra.
22AIM461.2	Apply the basics of CQL for retrieval and management of data.
22AIM461.3	Develop programs using CQL shell
22AIM461.4	Analyze practical knowledge in CQL functions and triggers, materialized views.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM461.1	3		-	-		-	-	-			-	-	3	3
22AIM461.2	3		-	-		-	-	-			-	-	3	3
22AIM461.3	3	3		-		-	-	-			-	-	3	3
22AIM461.4	3	3	3	3	3	-	-	-			-	-	3	3

Pgm. No.	List of Experiments / Programs	Hours	COs
----------	--------------------------------	-------	-----

Prerequisite Experiments/Programs/ Demo

Basics of Data base Concepts and SQL Basics

2

NA

PART-A

1	Demonstrate the Cassandra Installations and service configuration.	2	22AIM461.1
2	Demonstrate the CQL Shell commands: help, capture, consistency and copy with sample data base. Note: Discuss the about the shell, DDC and DMC.	2	22AIM461.1 22AIM461.3
3	Write a CQL shell script to demonstrate the following commands: 1.expand 2.show 3. Source 4. Describe 5. Exit.	2	22AIM461.1 22AIM461.3
4	Write a CQL query using select, where and order by clauses using a sample data base. Note: Discuss the CQL Clauses.	2	22AIM461.2 22AIM461.3
5	Write a CQL query to demonstrate the Cassandra keyspace and Table index concepts: Create key space, alter keyspace and Drop Key space, Truncate Table. Note: Discuss the Keyspace, Table index in cassandra.	2	22AIM461.1 22AIM461.2
6	Write a CQL query using set collection and List collection methods to display the data. Note: Discuss the Collection framework in cassandra.	2	22AIM461.1 22AIM461.2
PART B			
7	Write a CQL query using Map operation to store and retrieve data from data base. Note: Discuss the Map collection framework.	2	22AIM461.1 22AIM461.2 22AIM461.4
8	Demonstrate the scalar function and aggregate function using CQL query. Note: Discuss the CQL functions.	2	22AIM461.1 22AIM461.2 22AIM461.4
9	Demonstrate CQL Triggers concepts: a. Create the trigger b. drop the trigger Note: Discuss the importance of Triggers.	2	22AIM461.1 22AIM461.2 22AIM461.4
10	Write to demonstrate the materialized views using CQL: a. Create materialized view b. Alter materialized view c. Drop materialized view Note: Discuss the materialized views in cassandra.	2	22AIM461.1 22AIM461.2 22AIM461.4
11	Develop a small data base for real time data and manipulate data using basic DDL commands.	2	22AIM461.1 22AIM461.2 22AIM461.3 22AIM461.4

12	Develop a user define function for update and modify the database using CQL commands	2	22AIM461.1 22AIM461.2 22AIM461.3 22AIM461.4
----	--	---	--

- Video demonstration of Cassandra Installation.
- Contents related activities (Activity-based discussions)
- For active participation of students, instruct the students to prepare Handouts
- Organizing Group wise discussions on use-cases.

DATA VISUALIZATION

Course Code	22AIM462	CIE Marks	50
L:T:P:S	0:0:1:0	SEE Marks	50
Hrs /Week	2	Total Marks	100
Credits	01	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM462.1	Understand basic concepts and terminology of the Power BI service.
22AIM462.2	Apply the concept of data importing, charts and data cleaning.
22AIM462.3	Analyze the concept of View and export data from dashboards and reports.
22AIM462.4	Design the relationship between dash boards and reports, visualizations, and tiles.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM462.1	2			-	-	-	-	-	-	-	-	-	3	3
22AIM462.2	3			-	-	-	-	-	-	-	-	-	3	3
22AIM462.3	3	3	3	3	3	-	-	-	-	-	-	-	3	3
22AIM462.4	3	3	3	3	3	-	-	-	-	-	-	-	3	3

Pgm. No.	List of Experiments / Programs	Hours	COs
	Prerequisite Experiments/Programs/ Demo		
	Basic of Data Science Algorithms and Python	2	NA

PART-A

1	Visualize different groups of data using bar chart. Note: Discuss the different types of data and choosing appropriate chart type.	2	22AIM462.1 22AIM462.2
2	Visualize many different items and the composition of each item? (Stacked Bar) Note: Discuss the Design principles for effective visualizations	2	22AIM462.1 22AIM462.2
3	Import external data files of formats like excel, CSV into Power BI Note:: Discuss the Importing different data sources in Power BI	2	22AIM462.1 22AIM462.2
4	Handle data errors and missing values on the imported data Note: Discuss the Dealing with errors and inconsistent data	2	22AIM462.2 22AIM462.3
5	Create interactive report with filters Note: Discuss the inking visualizations through interactions	2	22AIM462.2 22AIM462.3
6	Create a dashboard report for the given dataset Note: Discuss the arranging visuals in dashboards	2	22AIM462.3 22AIM462.4
PART-B			
7	Create a new column or metrics and display in the report Note: Discuss the Basic DAX functions and formulas	2	22AIM462.3 22AIM462.4
8	Create a report with parameters which accepts user input Note: Discuss the parameterizing reports for dynamics analysis	2	22AIM462.3 22AIM462.4
9	Demonstrate conditional colour formatting in the report Note: Discuss the Visual formatting	2	22AIM462.3 22AIM462.4
10	Demonstrate the heat map report Note: Discuss the Heat maps	2	22AIM462.3 22AIM462.4
11	Demonstrate the drillthrough report	2	22AIM462.4
12	Creative effective report for the given dataset.	2	22AIM462.4

UNIVERSAL HUMAN VALUES AND LIFE SKILLS

Course Code	22UHK47	CIE Marks	50
L:T:P:S	1:0:0:0	SEE Marks	50
Hrs / Week	2	Total Marks	100
Credits	01	Exam Hours	02

Course outcomes:

At the end of the course, the student will be able to:

22UHK47.1	Understand the concept and significance of life skills and universal human values.
22UHK47.2	Develop Self-awareness and Self-management skills to promote personal growth.
22UHK47.3	Apply Critical and Creative thinking and ethical decision-making skills in various contexts.
22UHK47.4	Promote teamwork and collaboration while respecting diversity and inclusivity.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22UHK47.1	-	-	-	-	-	3	1	3	-	2	-	2
22UHK47.2	-	-	-	-	-	1	2	1	-	2	-	2
22UHK47.3	-	-	-	-	-	3	1	3	1	2	-	2
22UHK47.4	-	-	-	-	-	2	2	1	3	3	-	3

MODULE-1	Self-Awareness and Self-Management	22UHK47.1 22UHK47.2	3 Hours
-----------------	---	--------------------------------------	----------------

Emotional Intelligence, Techniques of self-awareness: SWOT and JOHARI WINDOWS, Stress management and coming out of comfort zone, managing failure, Time Management to recalibrate priorities.
Self-Exploration as a process of Value Education, the basic human Aspirations: Prosperity and Happiness, understanding infatuation.

Self-study / Role play	Understand qualities of Role Models, explore self and do SWOT analysis for growth; participate in role play and presentations to come out of comfort zone
------------------------	---

MODULE-2	Towards Yourself	22UHK47.1 22UHK47.3	3 Hours
-----------------	-------------------------	--------------------------------------	----------------

Exploring opportunities, understanding expectations and self for right fitment in profession, Goal Setting - Personal and Professional, aligning Personal and Professional goals for greater achievement, Mind-Maps as a tool for Goal Setting

Self-study / Mind Maps	Understand industry expectations to set professional goals; realizing connection between personal and professional goals for peaceful living
------------------------	--

MODULE-3	Leading self to lead others	22UHK47.3 22UHK47.4	3 Hours
-----------------	------------------------------------	--------------------------------------	----------------

Quality analysis of leader and self-evaluation, Critical thinking, Creative thinking and Ethical decision making, Critical thinking and Creative thinking for contribution to technical world, Six thinking hats, Exploring ethical decision-making frameworks and principles.

Activities / Case study/Applications	Case studies for Critical thinking and activities for Creative thinking
--------------------------------------	---

MODULE-4	Ownership towards Family and Society	22UHK47.2 22UHK47.3 22UHK47.4	3 Hours
-----------------	---	--	----------------

Responsibility, Diversity and Inclusivity:
Understanding personal and social responsibility; Appreciating diversity and managing inclusivity, promoting teamwork and collaboration while respecting differences.

Self-study / Interview with corporate people	Working on Task bar; team building activities; Interviewing Corporate experts to understand expectations
--	--

MODULE-5	Towards Nature and Industry	22UHK47.3 22UHK47.4	3 Hours
-----------------	------------------------------------	--------------------------------	----------------

Personal code of conduct for harmony between self and nature, resisting external pressures, negotiation and conflict resolution, assertiveness and empathy, change management

Role play	Role play to understand contributions to nature and industry
-----------	--

Credits	03	Exam Hours	03

Course outcomes: At the end of the course, the student will be able to:

22AIM48.1	Understand the technological needs and/or societal needs and sustainability of the environment
22AIM48.2	Apply practical knowledge and latest tools usage along with project development.
22AIM48.3	Analyze the outcome of the project. Design application using Data Science concepts/ techniques
22AIM48.4	Design application using Data Science concepts/ techniques
22AIM48.5	Implement the project and provide solutions within the context of the Legal framework, addressing social concerns and upholding ethical issues
22AIM48.6	Present the Report for implemented problem and its solutions as a team.

Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
22AIM48.1	2	-	-	-	-	1	1	1	-	-	-	3	3	2
22AIM48.2	3	-	-	-	3	-	-	-	-	-	-	-	-	-
22AIM48.3	3	3	-	-	3	-	-	-	-	-	-	-	-	-
22AIM48.4	3	3	3	-	-	-	-	-	-	-	-	3	3	2
22AIM48.5	3	3	3	3	3	2	2	2	2	-	-	3	3	2
22AIM48.6	3	3	3	3	3	1	1	1	2	2	-	3	-	-

Each team capable of identifying a problem and carry out a mini project on the problem defined. A panel of experts will review the code developed towards the project during the course of the semester. Plagiarized projects will automatically get an **“F” GRADE** and the student will be liable for further disciplinary action. At the completion of a project, the team will submit a project report, which will be evaluated by duly appointed examiner(s).

CIE Assessment Pattern (50 Marks – Theory)

RBT Levels		Review (50 marks)
L1	Remember	-
L2	Understand	10
L3	Apply	15
L4	Analyze	15
L5	Evaluate	10
L6	Create	-

SEE Assessment Pattern (50 Marks – Theory)

NATIONAL SERVICE SCHEME (NSS)

Course Code	22NSS30, 22NSS40, 22NSS50, 22NSS60	CIE Marks (each Semester)	50
L:T:P:S	0:0:0:0	SEE Marks	--
Hrs / Week	2	Total Marks	50 x 4 = 200
Credits	00	Exam Hours	02

Course outcomes:

At the end of the course, the student will be able to:

22NSSX0.1	Understand the importance of his / her responsibilities towards society.
22NSSX0.2	Analyse the environmental and societal problems/issues and will be able to design solutions for the same.
22NSSX0.3	Evaluate the existing system and to propose practical solutions for the same for sustainable development. Implement government or self-driven projects effectively in the field.
22NSSX0.4	Develop capacity to meet emergencies and natural disasters & practice national integration and social harmony in general.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

CIE Assessment Pattern (50 Marks – Activity based) –

CIE component for every semester	Marks
Presentation - 1 Selection of topic, PHASE - 1	10
Commencement of activity and its progress - PHASE - 2	10
Case study-based Assessment Individual performance	10
Sector wise study and its consolidation	10
Video based seminar for 10 minutes by each student at the end of semester with Report.	10
Total marks for the course in each semester	50

- Implementation strategies of the project (NSS work).
- The last report should be signed by NSS Officer, the HOD and principal.
- At last report should be evaluated by the NSS officer of the institute.
- Finally, the consolidated marks sheet should be sent to the university and also to be made available at LIC visit.

Suggested Learning Resources:**Reference Books:**

1. NSS Course Manual, Published by NSS Cell, VTU Belagavi.
2. Government of Karnataka, NSS cell, activities reports and its manual.
3. Government of India, NSS cell, Activities reports and its manual.

Pre-requisites to take this Course:

1. Students should have a service-oriented mindset and social concern.
2. Students should have dedication to work at any remote place, anytime with available resources and proper time management for the other works.
3. Students should be ready to sacrifice some of the time and wishes to achieve service-oriented targets on time.

Pedagogy:

- In every semester from 3rd semester to 6th semester, each student should do activities according to the scheme and syllabus.
- At the end of every semester student performance has to be evaluated by the NSS officer for the assigned activity progress and its completion.
- At last, in 6th semester consolidated report of all activities from 3rd to 6th semester, compiled report should be submitted as per the instructions.
- State the need for NSS activities and its present relevance in the society and provide real-life examples.
- Support and guide the students for self-planned activities.
- NSS coordinator will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress in real activities in the field.
- Encourage the students for group work to improve their creative and analytical skills.

Plan of Action:

- Student/s in individual or in a group Should select any one activity in the beginning of each semester till end of that respective semester for successful completion as per the instructions of NSS officer with the consent of HOD of the department.
- At the end of every semester, activity report should be submitted for evaluation.
- Practice Session Description:
 - Lecture session by NSS Officer
 - Students Presentation on Topics
 - Presentation - 1, Selection of topic, PHASE – 1
 - Commencement of activity and its progress - PHASE – 2

- Execution of Activity
- Case study-based Assessment, Individual performance
- Sector/ Team wise study and its consolidation
- Video based seminar for 10 minutes by each student at the end of semester with Report.

Sl No	Topic	Groupsize	Location	Activity execution	Reporting	Evaluation of the Topic
1.	Organic farming, Indian Agriculture (Past, Present and Future) Connectivity for marketing.	May be individual or team	Farmers land/Villages/ roadside / Community area / College campus	Site selection /proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
2.	Waste management– Public, Private and Govt organization, 5 R's.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Site selection /proper consultation/Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
3.	Setting of the information imparting club for women leading to contribution in social and economic issues.	May be individual or team	Women empowerment groups/ Consulting NGOs & Govt Teams /College campus	Group selection/proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
4.	Water conservation techniques – Role of different stakeholders– Implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection / proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

5.	Preparing an actionable business proposal for enhancing the village income and approach for implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
6.	Helping local schools to achieve good results and enhance their enrolment in Higher/ technical/ vocational education.	May be individual or team	Local government / private/ aided schools/ Government Schemes officers	School selection/proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
7.	Developing Sustainable Water management system for rural areas and implementation approaches.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection/proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
8.	Contribution to any national level initiative of Government of India. For eg. Digital India, Skill India, Swachh Bharat, Atmanirbhar Bharath, Make in India, Mudra scheme, Skill development programs etc.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
9.	Spreading public awareness under rural outreach programs. (minimum 5 programs)	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

10.	Organize National integration and socialharmony events / workshops / seminars. (Minimum 02 programs).	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
11.	Govt. school Rejuvenation and helping them to achieve good infrastructure.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

PHYSICAL EDUCATION (PE) (SPORTS AND ATHLETICS)

Course Code	22PED30, 22PED40	CIE Marks (each semester)	50
L:T:P:S	0:0:0:0	SEE Marks	--
Hrs / Week	2	Total Marks	50 x 2= 100
Credits	00	Exam Hours	02

Course outcomes:

At the end of the course, the student will be able to:

22PEDX0.1	Understand the fundamental concepts and skills of Physical Education, Health, Nutrition and Fitness
22PEDX0.2	Create consciousness among the students on Health, Fitness and Wellness in developing and maintaining a healthy lifestyle
22PEDX0.3	Perform in the selected sports or athletics of student's choice and participate in the competition at regional/state / national / international levels.
22PEDX0.4	Understand the roles and responsibilities of organization and administration of sports and games

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22PEDX0.1	-	-	-	-	-	2	-	3	3	-	-	2
22PEDX0.2	-	-	-	-	-	2	-	3	3	-	-	2
22PEDX0.3	-	-	-	-	-	2	-	3	3	-	-	2
22PEDX0.4	-	-	-	-	-	2	-	3	3	-	-	2

Semester	CONTENT	COs	HOURS
3RD 22PED30	Module 1: Orientation A. Lifestyle, B. Fitness C. Food & Nutrition D. Health & Wellness E. Pre-Fitness test.	22PED30.1 , 22PED30.2	5 HRS
	Module 2: General Fitness & Components of Fitness A. Warming up (Free Hand exercises) B. Strength – Push-up / Pull-ups C. Speed – 30 Mtr Dash D. Agility – Shuttle Run E. Flexibility – Sit and Reach F. Cardiovascular Endurance – Harvard step Test	22PED30.2 , 22PED30.3	15 HRS
	Module 3: Recreational Activities A. Postural deformities. B. Stress management. C. Aerobics. D. Traditional Games.	22PED30.3 , 22PED30.4	10 HRS
4TH 22PED40	Module 1: Ethics and Moral Values A. Ethics in Sports B. Moral Values in Sports and Games	22PED40.1 , 22PED40.2	5 HRS
	Module 2: Specific Games (Anyone to be selected by the student) A. Volleyball – Attack, Block, Service, Upper Hand Pass and Lower hand Pass. B. Throwball – Service, Receive, Spin attack, Net Drop & Jump throw. C. Kabaddi – Hand touch, Toe Touch, Thigh Hold, Ankle hold and Bonus. D. Kho-Kho – Giving Kho, Single Chain, Pole dive, Pole turning, 3-6 Up.	22PED40.3	20 HRS

E. Table Tennis – Service (Fore Hand & Back Hand), Receive (Fore Hand & Back Hand), Smash.		
F. Athletics (Track / Field Events) – Any event as per availability of Ground.		
Module 3: Role of Organization and administration	22PED40.4	5 HRS

CIE Assessment Pattern (50 Marks – Practical) –

CIE to be evaluated every semester end based on practical demonstration of Sports and Athletics activities learnt in the semester.

CIE	Marks
Participation of student in all the modules	10
Quizzes – 2, each of 7.5 marks	15
Final presentation / exhibition / Participation in competitions/ practical on specific tasks assigned to the students	25
Total	50

Suggested Learning Resources:

Reference Books:

1. Saha, A.K. Sarir Siksher Ritiniti, Rana Publishing House, Kalyani.
2. Bandopadhyay, K. Sarir Siksha Parichay, Classic Publishers, Kolkata.
3. Petipus, et.al., Athlete's Guide to Career Planning, Human Kinetics.
4. Dharma, P.N. Fundamentals of Track and Field, Khel Sahitya Kendra, New Delhi.
5. Jain, R. Play and Learn Cricket, Khel Sahitya Kendra, New Delhi.
6. Vivek Thani, Coaching Cricket, Khel Sahitya Kendra, New Delhi.

**BASIC APPLIED MATHEMATICS-II
(Common to all Branches)**

Course Code	22DMAT41	CIE Marks	50
L:T:P:S	0:0:0:0	SEE Marks	--
Hrs. / Week	2	Total Marks	50
Credits	00	Exam Hours	--

Course outcomes:

At the end of the course, the student will be able to:

22DMAT41.1	Gain knowledge of basic operations of vectors
22DMAT41.2	Use curl and divergence of a vector function in three dimensions
22DMAT41.3	Develop the ability to solve higher order Linear differential equations
22DMAT41.4	Know the basic concepts of Laplace transform to solve the Periodic functions and also solve initial and boundary value problems using Laplace transform method.

Mapping of Course Outcomes to Program Outcomes:

	PO 1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
22DMAT41.1	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT41.2	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT41.3	3	3	-	-	-	-	-	-	-	-	-	-
22DMAT41.4	3	3	-	-	-	-	-	-	-	-	-	-

MODULE-1	VECTORS	22DMAT41.1	8 Hours
Definition of scalar and vector, Vector addition, Subtraction and Multiplication-Dot product, Cross product, Scalar triple product. Orthogonal, Co-planar and Angle between vectors-Problems.			
Text Book	Text Book 1: 3.1, 3.5, 3.6, 3.9, Text Book 2: 7.1, 9.2, 9.3, 9.4.		

MODULE-2	VECTOR DIFFERENTIATION	22DMAT41.2	8 Hours
Vector differential operator-Gradient of a scalar function, Divergence of a vector function, Curl of a vector function-Problems. Solenoidal and irrotational vector fields-Problems.			
Text Book	Text Book 1: 8.5, 8.6, 8.7, Text Book 2: 9.7, 9.8, 9.9.		

MODULE-3	LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	22DMAT41.3	8 Hours
Solution of initial and boundary value problems, Inverse differential operator techniques for the functions- e^{ax} , $\sin(ax + b)$ and $\cos(ax + b)$.			
Text Book	Text Book 1: 13.3, 13.4, 13.5, 13.6,		

MODULE-4	LAPLACE TRANSFORM	22DMAT41.4	8 Hours
Definition and Laplace transforms of elementary functions-Problems. Properties of Laplace transforms (Shifting property-without proof), Periodic functions (without proof)-problems.			
Text Book	Text Book 1: 21.3, 21.4, 21.5, Text Book 2: 6.1.		

MODULE-5	INVERSE LAPLACE TRANSFORM	22DMAT41.4	8 Hours
Inverse Laplace Transform by partial fractions-Problems. Solution of linear differential equations using Laplace Transforms-Problems.			
Text Book	Text Book 1: 21.12, 21.15, Text Book 2: 6.4.

Activity-Based Learning (Suggested Activities in Class)/Practical Based Learning:

- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare Algorithms/Flowcharts/Programming Codes
 - Organizing Group wise discussions on related topics
 - Seminars

APPENDIX A

List of Assessment Pattern			
SNO	Tasks	Blooms category/Level	Remarks
1	Assignments	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
2	Group Discussions	Apply-L3, Analyse-L4	Group
3	Case Studies/CaseLets	Apply-L3, Analyse-L4, Evaluate-L5	Individual/ Group
4	Practical Orientation on Design thinking	Analyse-L4, Create-L6	Creativity&Innovation
5	Participatory & Industry- Integrated Learning	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
6	Practical activities/Problem solving exercises	Apply-L3, Analyse-L4, Evaluate-L5	Individual/ Group
7	Class Presentations	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
8	Analysis of Industry/ Technical /Business Reports	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
9	Reports on Industrial Visit	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
10	Industrial/Social/Rural Projects	Analyse-L4, Create-L6	Individual/ Group
11	Participation in external seminars/workshops	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
12	Any other academic activity	Understand-L2, Apply-L3, Analyse-L4	Individual/ Group
13	Online/ Offline Quizzes	Understand-L2, Apply-L3	
	Note:		
	1. The choice or selection of appropriate Tasks for each Assessment Type by the course coordinator		
	2. Assign/fix the marks for each Assessment Type by course co-ordinator.		
	3. Students either submit the report for Task or not, as determined by the course coordinator.		
	4. Need to get final approval from the HoD/BOS Chairman once finalising the mark allocations for Tasks and Assessment types.		

APPENDIX B

Outcome Based Education

Outcome-based education (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience, each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead, classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational Outcomes as defined by the National Board of Accreditation: Program Educational Objectives: The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and in particular, what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

Program Outcomes: What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

Course Outcome: The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

Mapping of Outcome:

APPENDIX C

The Graduate Attributes of NBA

- PO1 Engineering knowledge:** Apply the knowledge of mathematics, science, Engineering fundamentals, and an Engineering specialization to the solution of complex Engineering problems in Computer Engineering.
- PO2 Problem analysis:** Identify, formulate, review research literature, and analyze complex Engineering problems in Computer Engineering reaching substantiated conclusions using first principles of mathematics, natural sciences, and Engineering sciences.
- PO3 Design / Development of Solutions:** Design solutions for complex Engineering problems and design system components or processes of Computer Engineering that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and Environmental considerations.
- PO4 Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments in Computer Engineering, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5 Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern Engineering and IT tools including prediction and modeling to complex Engineering activities in Computer Engineering with an understanding of the limitations.
- PO6 The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice in Computer Engineering.
- PO7 Environment and Sustainability:** Understand the impact of the professional Engineering solutions of Computer Engineering in societal and Environmental contexts, demonstrate the knowledge of, and need for sustainable development.
- PO8 Ethics:** Apply ethical principles and commit to professional ethics, responsibilities, and norms of the Engineering practice.
- PO9 Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10 Communication Skills:** Communicate effectively on complex Engineering activities with the Engineering community and with society, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11 Project Management and Finance:** Demonstrate knowledge and understanding of the Engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary Environments.
- PO12 Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

APPENDIX D

BLOOM'S TAXONOMY

Bloom's taxonomy is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
